## Port 007

---

The following is a summary of the enhancements that have been implemented for this port.

### Improvements to server-side document printing queue

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
COMGET	COM Retrieve Files Stored on Server	028
COMQCO	COM List of Companies Query	008
IMPSET	Admin System Setup	028
SRSPB3	SRS Document Queue	003
SRSPM2	Maintain SRS Document Templates	018
SRSPRT	SRS Documents printing program	061

File	Version
IMPHEA.IMP	047
IMPSEC.IMP	021
SYSPROMA_REPORTQUEUE.DLL	006
SYSPROMA_WINUI.DLL	004
SYSPROREPORTINGHOSTSERVICE.EXE	013
SYSPROSRSSERVER.DLL	006

#### Why was this done?

There was a requirement for documents that were generated on the report server (using SRS server-side printing) to be accessible for processing from a client machine. In addition, a simple method for reducing the document queue size was required, as well as a few other functionality changes when working with the **SRS Document Queue**.

#### What was done?

The following changes were made to the **SRS Document Queue** program:

- You can now change the priority of an item in the queue, regardless of the status.
- Faxed documents are generated and stored in the document queue without sending them.
- Changes to the **Filter Options** allows further filtering on the destination, date and status of documents.
- A new **Warning** status indicates whether a document has been generated and stored, but there was a problem with printing/emailing.
- New operator activities have been added to control access to functionality.
- The **Purge Manager** is now accessible from the SRS Document Queue and allows you to purge large numbers of documents based on date, user or status.

- You can now preview completed documents and email them directly from the preview screen, or print to the SYSPRO default printer (or a specific printer).

The **Maintain SRS Document Templates** setup program allows you to specify whether a document should be physically printed (i.e. the print process can generate the document and store it in the database, without printing it). Although this option is also available for client-side printing, the generated document is simply discarded.

The **Admin System Setup** program has been updated to cater for the configuration of automatic purge settings for the document queue.

## Where can I see the change?

There is a new **Document Printing** group in the **Reporting** tab of the **Admin System Setup** program which includes the option: **Automatically purge queue** and an entry field to specify the number of days. These options are only available for server-side reporting.

New filter options for document destination, date and status are available in the **SRS Document Queue** program. There is also a button at the top of the screen which opens the **Purge Manager**, and a **Document Preview** is available when you select the **View** Document link in the **Document** column.

Several new activities have been added to the SYSPRO Document Services activity group to control operator access to the **SRS Document Queue** program. These activities are prefixed with **SRS Server**.

The **Maintain SRS Document Templates** setup program allows you to select **Do not print** from the **Add Printer** dropdown on the **Printers** pane.

## Custom form field validation across multiple fields and forms

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
IMPFRE	Admin Custom Forms Entry	029
IMPFRL	Admin Custom Form Validation Lookup	015
IMPFRM	Admin Custom Forms Entry and Design	042
IMPFRV	Admin Custom Forms Validation	005
IMPFSL	Admin Custom Form Shared Lookup	000

## Why was this done?

Although you could configure a lookup table for a specific custom form type and field, there was no way to share this lookup table across other forms and fields (i.e. lookup tables had to be duplicated for each field).

## What was done?

The following programs were changed to cater for a shared lookup table functionality:

- Admin Custom Forms Entry**

This program now caters for two new types of lookup in the Field Validation (i.e. Lookup shared (mandatory) and Lookup shared (not mandatory))

- Admin Custom Forms Entry and Design**

This program now caters for two new types of lookup in the Field Validation (i.e. Lookup shared (mandatory) and Lookup shared (not mandatory))

- **Admin Custom Form Validation Lookup**

This is a new program that handles the selection and maintenance of the shared lookup table.

## Where can I see the change?

The changes are available when selecting **Custom Forms** from the **Administration** tab of the SYSPRO Ribbon bar.

## AR Terms by Number of Fixed Days

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
ARSQCR	AR TB and Cr Management Report	025
COMXST	COM Customer Statement XML Creation	015

File	Version
AR_TRIAL_BALANCE	003

## Why was this done?

This forms part of the enhancement that was released in Port 005 relating to the ageing of AR invoices based on user-defined ageing buckets instead of the Accounts Receivable period end dates.

## What was done?

The **AR Trial Balance** caters for the new AR invoice terms to age according to the user defined fixed buckets.

The **Show Statements** function of the **AR Customer Query** program (selected from the **Query** menu) caters for the new AR invoice terms to age according to the user defined fixed buckets.

## Where can I see the change?

If you are using the new terms code option and user-defined ageing buckets, then the changes are visible when you produce the **AR Trial Balance** and when viewing **Customer Statements** in a browser window within the **AR Customer Query** program.

## New Buyers object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
INVSUY	Inventory Buyers Maintenance	000

## Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Buyer setup functionality.

## Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Foreign Price Codes object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
INVSXR	Foreign Currency Price Codes	000

## Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Foreign Price Codes setup functionality.

## Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New RMA Problem Codes object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
RMASPR	RMA Problem Code Maintenance	000

## Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require RMA Problem Codes setup functionality.

## Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Department Codes object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
SALSB2	Sales Analysis Departments Maintenance	000

### Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Department Codes setup functionality.

### Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Intrastat Delivery Terms object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
SALSED	SA Intrastat Delivery Terms Maintenance	000

### Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Intrastat Delivery Terms setup functionality.

### Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Intrastat Supplementary Units object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
SALSEU	SA Supplementary Units Maintenance	000

### Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Intrastat Supplementary Units setup functionality.

### Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Intrastat Transaction Nature object

---

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
SALSTN	SA Intrastat Nature of Tran Maintenance	000

### Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Intrastat Transaction Nature setup functionality.

### Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Buying Groups object

---

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
SORSBG	AR Buying Group Maintenance	000

### Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications requiring Buying Groups setup functionality.

### Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Inventory Cost UM object

---

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
INVSUM	Inventory Cost Unit of Measure Maintenance	000

### Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Inventory Cost Unit of Measure setup functionality.

## Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Payment Codes object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
SORSCE	Counter Sales Payment Type Maintenance	000

## Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Payment Codes setup functionality.

## Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Asset Reasons for Revaluation object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
ASSSRR	Asset Reason for Revaluation Maintenance	000

## Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Asset Reasons for Revaluation setup functionality.

## Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Asset Mechanics object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
ASSSME	Asset Mechanics Maintenance	000

## Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Asset Mechanics setup functionality.

## Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New LCT Tariff Code object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
PORSLT	LCT Tariff Code Maintenance	000

## Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require LCT Tariff Codes setup functionality.

## Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## New Purchase Order Discounts object

Version	Issue	Port
7.0	001_SP1	007

Program	Description	Version
PORSDS	PO Order Discounts Maintenance	000

## Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications that require Purchase Order Discounts setup functionality.

## Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

## Additional resources

---

### Training

SYSPRO provides extensive training materials to assist you in gaining a working knowledge of the modules and processes within SYSPRO. Please refer to the SYSPRO [InfoZone](#) for details on how to obtain these guides (<http://infozone.syspro.com/support>).

### Support

SYSPRO's [InfoZone](#) provides up-to-date information about the product as well as more advanced tutorials for registered users.

### Newsletter

As part of SYSPRO's ongoing commitment to keeping you informed about the latest product developments, a regular newsletter is distributed to the SYSPRO community. The newsletter covers many aspects of SYSPRO ranging from product enhancements to support-related information, known issues and useful tips. You can subscribe to this newsletter from the SYSPRO [InfoZone](#).

### Forums

SYSPRO provides a number of active on-line [forums](#) for you to engage in various discussions about the product.

### Contact us

Send us your comments to help us improve the standard of our reference guides. All emails can be sent to [Development-Authors@za.syspro.com](mailto:Development-Authors@za.syspro.com).
