10/17/2016

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78558**New Program and Version:** SORTIC (7.0.070)

Release Notes read as follows:

--- Synopsis ---

When invoicing more than one order in the same session of the e.net harness, the second and subsequent invoices were not posted correctly.

--- Details of Problems Experienced ---

When invoicing more than one order in the same session of the e.net harness, the second and subsequent invoices were not posted correctly.

--- Changes Implemented ---

The SO Batch Invoicing business object has been changed to ensure that all lines for invoices are processed correctly, when posting more than one invoice in the same session.

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78714**New Program and Version:** _EV_78326 (7.0.)

Release Notes read as follows:

--- Synopsis ---

POS: Dates interpreted incorrectly depending on regional settings

--- Details of Problems Experienced ---

When the server regional settings defines the date format as "yyyy-dd-MM" and the SYSPRO format is defined as "yyyy-MM-dd" the date would be incorrectly interpreted and either swap the day and month around or throw exceptions depending on the date.

--- Changes Implemented ---

The program has been changed to correctly interpret the dates.

SYSPRO 7 Update 1 Port:020**78710****Perception: 4**

2016/10/31

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78710**New Program and Version:** SORTOI (7.0.117)

Release Notes read as follows:

--- Synopsis ---

e.net: When you added a new sales order line for a stock code that uses unit quantity processing, the order quantity on the line was not saved.

--- Details of Problems Experienced ---

When you added a new sales order line for a stock code that uses unit quantity processing, the order quantity on the line was not saved.

--- Changes Implemented ---

The SO Import business object has been changed to add sales order lines correct qty for stock codes that used units quantity processing.

78649**Perception: 4**

31/10/2016

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78649**New Program and Version:** APSTIN (7.0.043)

Release Notes read as follows:

--- Synopsis ---

e.Net: When you ran the AP Invoice Posting business object and the PPV account required GL analysis there was no elements to provide GL analysis for the PPV entry.

--- Details of Problems Experienced ---

When you ran the AP Invoice Posting business object and the PPV account required GL analysis there was no elements to provide GL analysis for the PPV entry.

--- Changes Implemented ---

When you run the AP Invoice Posting business object and the PPV account requires GL analysis, the GL analysis can now be supplied through the PPVAnalysisLineEntry element.

10/31/2016

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78597**New Program and Version:** SALQ15 (7.0.012)**New Program and Version:** SA_TURNOVER_PRINT (7.0.005)

Release Notes read as follows:

--- Synopsis ---

When you ran the Sales Turnover report with a single salesperson as a selected filter, then the report crashed due to a SQL error.

--- Details of Problems Experienced ---

When you ran the Sales Turnover report with a single salesperson as a selected filter, then the report crashed due to a SQL error.

--- Changes Implemented ---

The business object SALQ15 was updated to cater for single salesperson filter options.

78575**Perception: 4**

2016/10/31

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78575**New Program and Version:** IMPFRO (7.0.201)

Release Notes read as follows:

--- Synopsis ---

If you use a VBScript to apply colour changes to cells in a list view (in the OnPopulate event) then the colour changes are applied briefly then disappear.

--- Changes Implemented ---

The fault was that the system assumed to apply Conditional Formatting AFTER the OnPopulate event and overwrote any colours applied. This has been corrected.

78401**Perception: 4**

10/10/2016

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78401**New Program and Version:** SORPCW (7.0.001)**New Program and Version:** SORTCW (7.0.008)

Release Notes read as follows:

--- Synopsis ---

When trying to change the warehouse on a credit note with a kit item, the kit component lines were ignored.

--- Details of Problems Experienced ---

When trying to change the warehouse on a credit note with a kit item, the kit component lines were ignored.

--- Changes Implemented ---

The SO Change Wh on Cr Note program has been changed to ensure that kit component lines are not ignored when changing warehouse on a credit note with a kit line. This only applies if calling the business object from SO Entry or SO Entry Express.

SYSPRO 7 Update 1 Port:020**78361****Perception: 4**

10/21/2016

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78361**New Program and Version:** SORTCW (7.0.009)

Release Notes read as follows:

--- Synopsis ---

When trying to change the warehouse on a credit note line for an ECC item, you could not post it if the 'dummy' lot did not exist in the new warehouse already.

--- Details of Problems Experienced ---

When trying to change the warehouse on a credit note line for an ECC item, you could not post it if the 'dummy' lot did not exist in the new warehouse already.

--- Changes Implemented ---

Changed SO Change warehouse on SO line business object to allow you to change the warehouse on a ECC item line, even if 'dummy' lot does not exist in the new warehouse.

78355**Perception: 4**

10/19/2016

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78355**New Program and Version:** WMSQPS (7.0.013)

Release Notes read as follows:

--- Synopsis ---

When you printed the Pick Slip report for an order line with quantity from multiple bins and you selected to exclude Lot information, the quantity doubled

--- Details of Problems Experienced ---

When you add an order line with quantity from two or more bins in a multiple bins environment, the line total would be doubled. The business object allocated the line totals to the bin lines if Lot information was excluded, thus doubling the line total. Version 12 was catering for multiple lots in a single bin.

--- Changes Implemented ---

The business object WMSQPS has been updated to cater for multiple bins for Lot information exclusion and to use bin quantities and not line total for the individual bins.

78054**Perception: 4**

10/28/2016

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78054**New Program and Version:** _EV_78326 (7.0.)

Release Notes read as follows:

--- Synopsis ---

POS: Printing disappears from printing queue on Windows 10

--- Details of Problems Experienced ---

When reports are printed from PoS on Windows 10 or later versions the print object disappears out of the print queue without printing.

--- Changes Implemented ---

The Stimulsoft components have been updated to the latest version and the printing now works.

SYSPRO 7 Update 1 Port:020

77905**Perception: 4**

10/11/2016

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 77905**New Program and Version:** APSP65 (7.0.023)

Release Notes read as follows:

--- Synopsis ---

When you ran the AP at a Glance by Branch, the totals did not correlate to the AP Trial Balance Totals By Branch.

--- Details of Problems Experienced ---

When you ran the AP at a Glance by Branch, the totals did not correlate to the AP Trial Balance Totals By Branch. This was due to the fact that the AP Trial Balance includes all take-on transactions in the Month-to-Date Activities, whilst the AP at a Glance by Branch included take-on transactions in the Opening Balance.

--- Changes Implemented ---

When you run the AP at a Glance by Branch, a new checkbox has been added to the toolbar to 'Include take-on transactions' - if this is selected, branch totals will correlate to the AP Trial Balance Totals By Branch. If unselected it will behave in the same manner as previously i.e. Take-on transactions will be included in the Opening Balance.

28/10/2016

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78618**New Program and Version:** SALQ15 (7.0.012)**New Program and Version:** SALQ16 (7.0.007)**New Program and Version:** SA_TURNOVER_BY_PRODUCT_CLASS (7.0.005)**New Program and Version:** _EV_78597 (7.0.)

Release Notes read as follows:

--- Synopsis ---

When you ran the Sales Turnover or Sales Turnover by Product Class reports, the report produced duplicate entries for Sales people with the same salesperson code.

--- Details of Problems Experienced ---

When you ran the Sales Turnover or Sales Turnover by Product Class reports, the report produced duplicate entries for Sales people with the same salesperson code, although these sales people were allocated to different branches.

--- Changes Implemented ---

The business objects for Sales Turnover (SALQ15) and Sales Turnover by Product Class (SALQ16) have been updated to prevent duplicate errors.

78600**Perception: 3**

2016/10/31

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78600**New Program and Version:** IMPFRO (7.0.201)

Release Notes read as follows:

--- Synopsis ---

If you are using 'cases and pieces' type for a stock code, then the ORDER QUANTITY variable passed to a VBScript function only passes the PIECES value and not the full converted value.

--- Details of Problems Experienced ---

If you are using 'cases and pieces' type for a stock code, then the ORDER QUANTITY variable passed to a VBScript function only passes the PIECES value and not the full converted value. Similarly, if you attempt to set the ORDER QUANTITY value from a VBScript it is impossible to set the PIECES value.

--- Changes Implemented ---

The VBScript engine did not recognise a 'cases and pieces' field type. This has been corrected so that an entry of ' 2/5 BOX/EA ' is converted to 2.5 (assuming a conversion factor of 12 [divide]) and passed into the VBScript variable. , this VBScript statement to set the order quantity:

StockedLine.CodeObject.OrderQuantity = 2.5 be converted back to ' 2/5 BOX/EA ' : The VBScript engine only knows about the Pieces factor - it does not know whether the factor is DIVIDE or MULTIPLY, and therefore assumes DIVIDE as being the typical operand.

Release Notes read as follows:

--- Synopsis ---

When you ran the Cash Book Tax Distribution report, the tax values printed differed from those on the Tax Return.

--- Details of Problems Experienced ---

When you ran the Cash Book Tax Distribution report, the tax values printed differed from those on the Tax Return. When you capture a Cash Book transaction inclusive of tax, the program rounds the calculated tax value associated with each GL Distribution line. Some tax tables were updated with the rounded tax values and other tables were updated with the un-rounded values. Because of this, when you compared the tax values on the Tax Distribution Report against those on the Tax Return, the values were not the same.

--- Changes Implemented ---

The tax values on the Cash Book Tax Distribution Report and the Tax Return now both reflect the rounded tax values.

Event: 78313**New Program and Version: ARSP40 (7.0.053)****New Program and Version: ARSQ40 (7.0.000)**

Release Notes read as follows:

--- Synopsis ---

When printing the customer's statement in a batch the current balance prints incorrectly. Whereas, when you print the statement for this one customer only, it prints correctly.

--- Details of Problems Experienced ---

When you printed statements for a customer who has invoices that have a combination of new number of days fixed and any other terms type, then statements printed after that that did not have number of days fixed terms printed the current balance incorrectly.

--- Changes Implemented ---

The AR Statement Print program has been updated to ensure that the printing of statements for customers defined as number of days fixed terms does not affect the balance of the other statements that are printed thereafter. In addition to this the program has been updated to ensure that when a single statement has a combination of invoices with invoice terms set as either "number of days fixed" or any other terms, that the ageing for the last bucket is correct.

Event: 78305**New Program and Version: INVENTORY_VALUATION (7.0.006)****New Program and Version: INVQVL (7.0.027)**

Release Notes read as follows:

--- Synopsis ---

There is a requirement for the Inventory valuation report to enable the option for a LIFO valuation report.

--- Details of Problems Experienced ---

There is a requirement for the Inventory valuation report to enable the option for a LIFO valuation report. This is essentially the same as FIFO report in relation to the business object INVQVL.

--- Changes Implemented ---

The report form has been updated to visually show the LIFO valuation option. The report has been updated to render a LIFO valuation report.

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78304**New Program and Version:** DISSTD.WRK (7.0.)**New Program and Version:** MSGDISEN.IMP (7.0.)**New Program and Version:** SORPS4 (7.0.020)

Release Notes read as follows:

--- Synopsis ---

A message box is displayed warning you of a duplicate key when a second dispatch note is created for the same sales order. This appears to be an error message but a second dispatch is still created.

--- Details of Problems Experienced ---

In the Dispatch Note Header window, a message box is displayed stating that the dispatch note forms part of a duplicate key when a second dispatch is created for the same sales order. This appears to be a "Stop processing" message but a dispatch note with the next number is then created.

--- Changes Implemented ---

The Dispatch Note Header window now displays a more user-friendly, informational message box when dealing with duplicate dispatch notes. The functionality to no longer display the same message more than once has also been added.

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78293**New Program and Version:** WIPTJM (7.0.059)

Release Notes read as follows:

--- Synopsis ---

When you delete a material allocation, which was originally added to the job via the Material allocation Business object, then the attached hierarchy is not deleted.

--- Details of Problems Experienced ---

When you delete a material allocation against a hierarchical job, which was originally added to the job via the Material allocation Business object, then the attached hierarchy is not deleted from the P&C Hierarchy Cross Reference table.

--- Changes Implemented ---

The Material allocation Business object has been changed to ensure that the Index Job field is only updated for sub jobs, when adding a material allocation to a hierarchical job. Thus the attached hierarchy will now also be not deleted from the P&C Hierarchy Cross Reference table when the Material allocation is deleted.

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 78050**New Program and Version:** INVQWR (7.0.022)

Release Notes read as follows:

--- Synopsis ---

e.net. The business object, Inventory Where-Referenced Query, had the list functionality added to the Warehouse filter option.

--- Details of Problems Experienced ---

The list feature was absent from the business object and had to be added for extra functionality. There was also a fault when selecting Include Pricing option when there was no foreign currency.

--- Changes Implemented ---

The list feature was added to the Warehouse filter option to accommodate the list feature, in which one can define a list on which to filter. This list can handle up to 30 defined list items. This makes the Warehouse filter option available to use The All, Range, Single or List functionality. fix also corrected the fault mention in the problems experienced. the Schema and sample XML instances in the Business Object Reference Library on the Support Zone for information about the XML parameters.

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 020

Event: 77583**New Program and Version: MRPP40 (7.0.088)**

Release Notes read as follows:

--- Synopsis ---

When a minimum warehouse quantity requires checking for a batching rule/order policy for non-current ECC deplete oldest demand in the MRP Requirements Calculation then this was not handled correctly

--- Details of Problems Experienced ---

It is recommended to suppress non-current ECC rev/rel ordering and really should be done for run out to be handled correctly, however if this has not been done and a minimum warehouse quantity requires checking for the batching rule/order policy, then this was not done correctly when netting off deplete oldest demand in the MRP Requirements Calculation.

--- Changes Implemented ---

The MRP Requirements Calculation has been changed so that when non-current rev/rels for ECC deplete oldest components are being processed and you are not suppressing ordering of non-current ECC controlled items and a batching rule/order policy which uses a minimum warehouse quantity is used, the minimum warehouse quantity is now checked correctly. again needs to be stressed though that it is recommended to suppress MRP ordering of non-current ECC rev/rels for ECC controlled items when the BOM setup option Deplete oldest rev/rel first is switched on so that suggested orders will only be raised on the current rev/rel of an item as per the online help.

Release Notes read as follows:

--- Synopsis ---

POS: Customer creation on quotes

--- Details of Problems Experienced ---

There is a requirement to be able to create customers when creating quotes.

--- Changes Implemented ---

The program has been changed to allow for customer and contact creation when creating a quote. Two new branch options Force Customer Creation on Quotes and Force Contact Creation on Quotes which will enable the ability to create customers and contacts on quotes. The customer creation is online only so the customer will immediately be posted to SYSPRO. In a offline environment the customer will be posted to the online POS and then the default cash customer will be used for pricing calculations until the customer is available offline due to replication and the quote is reloaded.

Event: 78120**New Program and Version:** COMQHC (7.0.002)**New Program and Version:** COMQSQ (7.0.002)**New Program and Version:** INVQBL (7.0.001)**New Program and Version:** INVQBS (7.0.001)**New Program and Version:** SORQBL (7.0.001)

Release Notes read as follows:

--- Synopsis ---

The health check queries did not support the HOLDLOCK locking option when accumulating data for comparison.

--- Details of Problems Experienced ---

The health check queries did not support the HOLDLOCK locking option when accumulating data for comparison. HOLDLOCK option in SQL is useful insofar as it will hold any shared locks on the rows being queried preventing other processes from updating these until the query is complete. This ensures more consistency when comparing quantities etcetera across multiple tables as is done in the balance queries.

--- Changes Implemented ---

A new option 'H' can be entered in the LockType element when running COMQHC. This will apply HOLDLOCK when aggregating information in the balance queries.

Release Notes read as follows:

--- Synopsis ---

When you ran the AR Statement Print on a large SQL database it was very slow.

--- Details of Problems Experienced ---

When you ran the AR Statement Print on a large SQL database it was very slow.

--- Changes Implemented ---

The AR Statement Print program (SQL only) has been changed to cater for Statements to be printed using SQL Optimization. Selecting to Print optimized statements calls the new Business Object ARSQ40. Due to the large amount of data that also hampers the speed, we no longer populate the DetInvPayments element , which was a duplication of data. Crystal can be manipulated to produce the desired results.

SYSPRO 7 Update 1 Port:020**Legend:**

5 - Critical. This could mean that the software will cause an unrecoverable data loss, it may have a serious financial implication to the customer, there may be a security issue, or there may be legal implications.

4 - Serious. This means that there is a remote chance of data loss, a remote chance of a financial implication to the customer, or that there is a possibility that it will affect many customers.

3 - Error. There is an error in the functionality of the program, but this will not stop the customer doing any major part of their business.

2 - Minor Error. There is a minor error in the functionality of the program, and this will not stop a customer doing any part of their business. This is likely to just be a cosmetic problem.

1 - Enhancement. This is an enhancement to the system.

0 - Ease of use. This may be something that could make life easier for the customer, or a change in the user interface for consistency or to improve usability.
