2017/02/15
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 80078
New Program and Version: IMP040 (7.0.326)
Release Notes read as follows:

--- Synopsis ---
In SO Entry. if you added a stocked line where the warehouse has no cost, the stock allocations were not saved against the warehouse, even after you continued at the zero-cost warning.

--- Details of Problems Experienced ---
In SO Entry. if you added a stocked line where the warehouse has no cost, the stock allocations were not saved against the warehouse, even after you continued at the zero-cost warning.

--- Changes Implemented ---
The SO Entry program has been changed to ensure that stock allocated on a sales order line for a zero-cost warehouse is updated correctly.

80058   **Perception: 4**

22/02/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 80058
New Program and Version: ARSPPR (7.0.014)
Release Notes read as follows:

--- Synopsis ---
In the AR Payment Run program, when you re-established an invoice and clicked around the 'Documents to pay' grid, the screen was locked down and the payment run could never be posted.

--- Details of Problems Experienced ---
In the AR Payment Run program, when you re-established an invoice and clicked around the 'Documents to pay' grid, the screen was locked down and the payment run could never be posted.

--- Changes Implemented ---
The AR Payment Run program has been changed so that after the re-established invoice has been added, the screen is not in a state of lockdown and you can continue to capture the payment run and post it.

SYSPRO 7 Update 1 Port:023

80023   **Perception: 4**

2017/02/24
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 80023
New Program and Version: ARP.PRO (7.0.)
New Program and Version: ARSPGP (7.0.027)
New Program and Version: ARSTGP (7.0.016)
Release Notes read as follows:

--- Synopsis ---
When you ran the AP Payment Integration and you changed the default branch against the invoice the tax on settlement discount was posted to the incorrect GL account.

--- Details of Problems Experienced ---
When you ran the AP Payment Integration and you changed the default branch against the invoice the tax on settlement discount was posted to the incorrect GL account.

--- Changes Implemented ---
When you run the AP Payment Integration and you change the default branch against the invoice the tax on settlement discount will now post to the correct GL account.

80018   **Perception: 4**

2017/02/14
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 80018
New Program and Version: POPOST.PRO (7.0.)
New Program and Version: PORPRI (7.0.074)
New Program and Version: PORURI (7.0.001)
New Program and Version: PORURI.LNK (7.0.)
Release Notes read as follows:

--- Synopsis ---
The Purchase Order Inspection file update utility program was not passing back information regarding an LCT inspection needed to succesfully post the GRN details

--- Details of Problems Experienced ---
The Purchase Order Inspection file update utility program was not passing back information regarding an LCT inspection needed to succesfully post the GRN details.

--- Changes Implemented ---
The Purchase Order Inspection file update utility program has been changed to pass back information regarding an LCT inspection so that the GRN details are correctly posted.

79993   **Perception: 4**

2/27/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79993
New Program and Version: _EV_79925 (7.0.)
Release Notes read as follows:

--- Synopsis ---
In Manage orders, when you select to Add a customer, the customer details you entered would not save unless you had the branch option "Force customer creation on sales" set.

--- Details of Problems Experienced ---
In Manage orders, when you select to Add a customer, the customer details you entered would not save unless you had the branch option "Force customer creation on sales" set. This is incorrect since adding a customer in Manage Orders has not relation to this branch option.

--- Changes Implemented ---
The Customer Add screen called from Manage orders was changed to ignore the branch setup option "Force customer creation on sales" when adding a customer from manage orders.

79974   **Perception: 4**

2017/02/20
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79974
New Program and Version: IOPP03 (7.0.006)
Release Notes read as follows:

--- Synopsis ---
When you ran Pareto Analysis it called another program IO Post Transactions silently, and this program caused certain transactions to accumulate in a year-to-date fashion, which was incorrect

--- Details of Problems Experienced ---
When you ran Pareto Analysis it called another program IO Post Transactions silently, and this program caused certain transactions to accumulate in a year-to-date fashion, which was incorrect.

--- Changes Implemented ---
The program IO Post Transactions to History has been changed update the table Iop Sales correctly when run silently through Pareto Analysis. More specifically, the program won't accumulate transaction quantities when demand history existed on the Iop Sales Table and you are importing earlier demand history. There is a condition when this accumulation does happen: Assume you import demand history for 10 units on 16 Feb 2016, then later on the same day you import 5 units. The field QUANTITY on the table Iop Sales will contain 15 units. This is the correct response and an example of the accumulation refered to earlier in this document. The year-to-date fields in Iop Sales will always display quantities in a cumulative fashion.

79939   **Perception: 4**

10/02/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79939
New Program and Version: CSHP10 (7.0.126)
Release Notes read as follows:

--- Synopsis ---
When you added an 'Unreconciled Withdrawal' in CB Deposits and Withdrawals and posted to a job, you could not correct the date of the transaction

--- Details of Problems Experienced ---
When you added an 'Unreconciled Withdrawal' in CB Deposits and Withdrawals and posted to a job, you could not correct the date of the transaction. The system would not allow you to go back and re-enter the transaction either.

--- Changes Implemented ---
The CB Deposits and Withdrawals program has been changed so that when you capture an unreconciled withdrawal and post to a job, you can change the date of the transaction if you have entered this incorrectly.

79917   **Perception: 4**

13/02/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79917
New Program and Version: SORINVS.WRK (7.0.)
New Program and Version: SORINVUP.PRO (7.0.)
New Program and Version: SORTIC (7.0.072)
New Program and Version: SORTNC (7.0.046)
Release Notes read as follows:

--- Synopsis ---
e.net: When invoicing via SORTIC, if the order has kit type 'S' parent, the AR transaction details were not updated for the parent.

--- Details of Problems Experienced ---
When invoicing via SORTIC, if the order has kit type 'S' parent, the AR transaction details were not updated for the parent.
--- Changes Implemented ---
Changed the SO Invoice Calculation business object to ensure that AR details for the parent of a kit type 'S' line are updated with the component details when the invoice is processed in warehouse/stock code sequence.

79884   **Perception: 4**

2017/02/10
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79884
New Program and Version: IMP041 (7.0.204)
New Program and Version: IMPWRFBI.IMP (7.0.003)
New Program and Version: SAMPLE_BLANK_SO_DISPATCH_NOTE_DOCUMENT (7.0.)
New Program and Version: SAMPLE_SO_DISPATCH_NOTE_DOCUMENT (7.0.)
Release Notes read as follows:

--- Synopsis ---
When printing a Dispatch Note, you were unable to print the sales order line number linked to the dispatch line
--- Details of Problems Experienced ---
When printing a Dispatch Note, you were unable to print the sales order line number linked to the dispatch line.
--- Changes Implemented ---
The SO Batch Invoicing program has been updated to enable you to print the sales order line number on a Dispatch Note document print. The document formats now have a new element available to pull into SRS or Word formats.

2017/02/10
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79879
New Program and Version: IMPQ11 (7.0.020)
Release Notes read as follows:

--- Synopsis ---
When you ran the Inventory Journal Report in a C-Isam environment, the report did not print.
--- Details of Problems Experienced ---
When you ran the Inventory Journal Report in a C-Isam environment, the report did not print.
--- Changes Implemented ---
When you run the Inventory Journal Report in a C-Isam environment, the report will print correctly.

79871   **Perception: 4**

2/27/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79871
New Program and Version: _EV_79925 (7.0.)
Release Notes read as follows:

--- Synopsis ---
POS: Document variables are locked when opening existing templates in the Document Designer
--- Details of Problems Experienced ---
When the printing designer is used to change existing document templates the variables are now loaded as locked.
--- Changes Implemented ---
Stimulsoft made a change whereby all variabled are now locked when loaded into the report. The resolution is to run through all variables and set them to Inherit = false. This change has been implemented so loading the templates now will cause variables to be unlocked.

Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79799
New Program and Version: COMSMM (7.0.007)
Release Notes read as follows:

--- Synopsis ---
'Multimedia Setup Business Object' - When you validate multimedia from 'IMPIMP - Import Master Data' then the
Multimedia Setup business object is also doing the import functionality.

--- Details of Problems Experienced ---
'Multimedia Setup Business Object' - When you validate multimedia from 'IMPIMP - Import Master Data' then the
Multimedia Setup business object is also doing the import functionality. The validate only flag was not being included in the
parameters when calling 'Multimedia Setup Business Object'.

--- Changes Implemented ---
'Multimedia Setup Business Object' - I have updated program to ensure that when called from 'Import Master Data' to
validate, it must validate only.

SYSPRO 7 Update 1 Port:023

79798   **Perception: 3**

2017/02/17
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79798
New Program and Version: INVBST (7.0.042)
Release Notes read as follows:

--- Synopsis ---
When you ran the Stock Code Browse program then the selected sequence was removed.
--- Details of Problems Experienced ---
When you ran the Stock Code Browse program then the selected sequence was removed. This happened when you selected to change the prices for a stock code then when the stock codes are reloaded in an incorrect sequence.
--- Changes Implemented ---
The Stock Code Browse program has been changed to ensure that the selected sequence is restored when you select to change the prices.

79791   **Perception: 3**

2017/02/20
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79791
New Program and Version: PORPM9 (7.0.066)
Release Notes read as follows:

--- Synopsis ---
Requisition Maintenance program stops responding when pressing shift + tab on the Requisition Header pane
--- Details of Problems Experienced ---
Requisition Maintenance program stops responding when pressing shift + tab on the Requisition Header pane.
--- Changes Implemented ---
The program goes into a loop when pressing shift + tab. It happens because all of the fields on the form are entry fields which are disabled. Carol and I added all the fields to a group and also added a routing hyperlink to the pane.

79788   **Perception: 3**

27/02/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79788
New Program and Version: IMPMEN (7.0.186)
Release Notes read as follows:

--- Synopsis ---
If you have switched on the CALENDAR (either to use Outlook or the XML option), then when running TASKS it's possible that the system can freeze.

--- Details of Problems Experienced ---
If you have switched on the CALENDAR (either to use Outlook or the XML option), then when running TASKS it's possible that the system freezes when executing any long-running process (such as running a month-end), and if you are running ir client/server mode.

--- Changes Implemented ---
The calendar control interferes with the WCF service when determining 'reminders'. resolve the problem reminders for the Calendar control are switched off while running any program and are switched back on again when returning to the main menu.

79771   **Perception: 3**

10/02/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79771
New Program and Version: APSSII (7.0.006)
Release Notes read as follows:

--- Synopsis ---
The Ap Initial invoice capture program captured invoices with incorrect values being entered in numeric fields.

--- Details of Problems Experienced ---
The Ap Initial invoice capture program captured invoices with incorrect values being entered in numeric fields. the user entered alpha characters in numeric fields the program still wrote the record but with a zero amount for the numeric fields. There was no error message to tell the user that the values entered was incorrect.

--- Changes Implemented ---
When you now run AP Initial Invoice Capture and enter incorrect entries for numeric fields, the program will not write the record and an error message will be displayed.

Event: 79405
New Program and Version: CUSTOMIZ.WRK (7.0.)
New Program and Version: IMPFRO (7.0.204)
New Program and Version: IMPMEN (7.0.186)
Release Notes read as follows:

--- Synopsis ---

Predictive Search enhancements

--- Changes Implemented ---

Predictive Search enhancements implemented as follows:
. The user can now decide whether the search for a given key field is enabled for a TOOLBAR, FORM, or in DATA GRID. Previously you could only stop predictive search for a key field but that would be for all toolbars, forms and data grids.
. Any selections made regarding options, including any filter options are now saved in the operator's preference (operator.PRF) file on the server, and are re-applied when running SYSPRO again. only options not saved are:
a. The option to stop predictive search for all key fields
b. The option to filter for a specifically named column.
. If the user has stopped using predictive search for a key field, then it can be re-enabled by clicking on the SETTINGS icon on the main ribbon bar and selecting 'Use Predictive Search for...'. A list of key fields that have been stopped is displayed and the user can click on the key field to be re-enabled.
. If the user elects to stop using predictive search for ALL key fields, then this is only applicable for the current run of SYSPRO. However, the user can switch this on again under the SETTINGS icon on the main ribbon bar as explained above.

SYSPRO 7 Update 1 Port:023

79395   **Perception: 3**

2017/01/27
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79395
New Program and Version: ARSQ85 (7.0.017)
New Program and Version: AR_CUSTOMER_MOVEMENT (7.0.007)
Release Notes read as follows:

--- Synopsis ---
When you attempted to process the AR Customer Movement Report the "Show zero invoice balance" option did not work.

--- Details of Problems Experienced ---
When you attempted to process the AR Customer Movement Report the "Show zero invoice balance" option did not work. All the movements were returned. The caption was misleading and needed to be changed to "Show zero value movement'

--- Changes Implemented ---
When you process the AR Customer Movement Report the "Show zero invoice balance" option has been renamed to "Show zero value movement". This will include/exclude invoice(s) that have a zero value sale amount.

Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 78899
New Program and Version: BOMP3F (7.0.048)
Release Notes read as follows:

--- Synopsis ---

When you have manual release numbering switched on for ECC and you have more than one affected item to apply the entered release to you could not do so automatically

--- Details of Problems Experienced ---

When you have manual release numbering switched on for ECC and you have more than one affected item to apply the entered release to you could not do so automatically. same was true of manual revision numbering.

--- Changes Implemented ---

The ECC ECO Change Order Status program has been changed so that when you get to the screen to capture a new revision and release before applying the BOM changes, there is a new option to allow you to apply all options selected to all affected items. This option means that if you have manual revision or release numbering and you wish the entered revision or release to apply to all affected items you can do so by selecting the option. the option â€œApply all options to all affected itemsâ€ is selected and you have already captured a manual revision or release for subsequent affected items when the affected items were added to the ECO then this captured information will be used and the manual revision or release entered at the point of asking for a revision and release before applying the BOM changes will not be used. the option â€œApply all options to all affected itemsâ€ is selected and you have automatic revision numbering and you select to increment the revision, then the option â€œIncrement the revision of all affected itemsâ€ will be selected and the revision will be incremented for all affected items the option â€œApply all options to all affected itemsâ€ is selected and you have automatic release numbering and you select to increment the release, then the option â€œIncrement the release of all affected itemsâ€ will be selected and the release will be incremented for all affected items the option â€œApply all options to all affected itemsâ€ is selected and the archiving option is immediate, prompted, the archiving old option will be applied to all affected items and the archiving option â€œApply to all affected itemsâ€ will be selected.

Release Notes read as follows:

--- Synopsis ---
POS: Password expiry does not work properly in offline once the operator password expires

--- Details of Problems Experienced ---
When a operator's password has expired and they log into a offline branch POS requests that the password must be changed. After the password has been changed the user will be asked to change their password every time they log into the offline branch.

--- Changes Implemented ---
The program has been fixed to correctly record the password change at the online branch and update all offline branches with the correct values

SYSPRO 7 Update 1 Port:023

78447   **Perception: 3**

2017/02/27
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 78447
New Program and Version: COMSFM (7.0.007)
Release Notes read as follows:

--- Synopsis ---
COM Custom Form Setup - does not format key values for numeric keys

--- Details of Problems Experienced ---
When saving Custom form data - using the COM Custom Form Setup business object - with a numeric key type you have to supply the full key value for a key, including all of the leading zeroes.This was always by design and it is not considered to be an error.

--- Changes Implemented ---
To make it easier to import Custom Form Data the COM Custom Form Setup business object has been changed to correctly format numeric key values, but only when the custom form type has a single key column. When the custom form type has multiple key columns the calling process will still have to correctly provide the fully formatted key, including all leading zeroes for numeric key values.It is not possible to programmatically split the individual key parts unless they have been fully formatted.If there is a requirement to save data for type without fully formatting the key then make use of the COM Custom Form Post business object, which was written to overcome the limiations in the COM Custom Form Setup business object.

78191   **Perception: 3**

2017/02/20
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 78191
New Program and Version: COMLGN (7.0.076)
Release Notes read as follows:

--- Synopsis ---
When an e.net logon process attempted to issue a 'USE Database name' statement the return status was not being validated. This could lead to confusing messages if an error occurred.

--- Details of Problems Experienced ---
When an e.net logon process attempted to issue a 'USE Database name' statement the return status was not being validated. This could lead to confusing messages including that the database version was incorrect - even though it was valid. into SYSPRO would show the correct message - often revealing the real issue.

--- Changes Implemented ---
The e.net logon process has been enhanced to detect the status of the 'USE' statement and return an exception showing the statement being issued (eg 'USE SysproCompanyA') and the SQL Server error message returned - this often can be used to help to correct any problems.

SYSPRO 7 Update 1 Port:023

77695 **Perception: 3**

2017/02/14
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 77695
New Program and Version: COMTDD (7.0.002)
Release Notes read as follows:

--- Synopsis ---

COM Migrate Data Dictionary to Database - There is a requirement for more stringest validation when importing Custom Form definitions.

--- Details of Problems Experienced ---

COM Migrate Data Dictionary to Database - There is a requirement for more stringest validations for when generating the DefnCustomForm table from a custom version of IMPCFM.IMP (CUSFRM.IMP).

--- Changes Implemented ---

COM Migrate Data Dictionary to Database - More stringest checking has been added when generating the DefnCustomForm table from a custom version of IMPCFM.IMP (CUSFRM.IMP). This validation will also be applied to the standard IMPCFM.IMP when importing the standard custom form definitions into the DefnCustomForm table. following additional validation will be applied:- Blank description is not allowed.- Table name or custom table name must be non-blank unless type is 'DUM'.- Ensure multiple forms supported flag contains valid options (M, - or blank).- Multiple forms supported flag value of 'M' is only valid for the 'CRMCON' custom form type. All others must be blank.- When defining a custom table name a key structure must be defined.

77654 **Perception: 3**

2017/02/14
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 77654
New Program and Version: COMTDD (7.0.002)
Release Notes read as follows:

--- Synopsis ---

COM Migrate Data Dictionary to Database - Message not clear if SQL user does not have BULK INSERT permissions.

--- Details of Problems Experienced ---

When performing the minor database upgrade the latest SYSPRO data dictionary is inserted into Tables in the SYSPRO configuration database by means of a BULK INSERT process. If the SQL user defined against the Database tab in the System Setup program does not have "Administer bulk operations" permissions then the BULK INSERT process would fail and the upgrade process would fail with a message that the number of records on the DdsTables table does not match the number of records inserted. actual SQL error message was being cleared when closing the connection to SQL.

--- Changes Implemented ---

The COM Migrate Data Dictionary to Database program has been changed so that the correct SQL error message is displayed. This way the SYSPRO administrator will know to go and change the SQL user to give it the required permissions.

Release Notes read as follows:

--- Synopsis ---

When you use the SRS search windows to search for text that consist of two or more words, then the search fails and returns an error.

--- Details of Problems Experienced ---

When you use the SRS search windows to search for text that consist of two or more words, then the search fails and returns an error.

--- Changes Implemented ---

The SRS search windows has been changed to use a delimiter when adding variables to the expression field before searching.

77298   **Perception: 3**

2017/02/24
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 77298
New Program and Version: IMPMCI (7.0.041)
Release Notes read as follows:

--- Synopsis ---

'IMPMCI - Admin multimedia' - Multimedia file names for quotation that were added in SYSPRO 6.1 cannot be accessed because a version was add to the quotation key.

--- Details of Problems Experienced ---

'IMPMCI - Admin multimedia' - When you do the conversion from SYSPRO 6.1 to SYSPRO 7, then a default quotation version 000 is added to a quotation key. This is a problem if you are using %key on IMPMCI for quotation multimedia because the program cannot find the quotation multimedia file name since the changes has changed but multimedia file name does not.

--- Changes Implemented ---

I have updated program 'IMPMCI - Admin multimedia' to ensure that when checking for a quotation multimedia file name, the program must look for a multimedia file name that matches the: 1). Quotation full key. 2). Quotation key without version. 3). Quotation full key considering the presentation length. 4). or Quotation key without version considering the presentation length.

2017/02/28
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 75346
New Program and Version: _EV_79925 (7.0.)
Release Notes read as follows:

--- Synopsis ---

A new function has been developed to allow the automatic reconciliation of payments and transactions posted to the Transactional bank for each branch and End of Day.

--- Details of Problems Experienced ---

POS uses a transactional bank as a 'dummy' bank for all transactions done for the day before the End of Day is run. There was no easy way to reconcile this bank as it was not logically grouped per end of day and transactions would appear as the bank deposit slip was run. This new function makes is easier for finance to manage the account by exception rather than try reconcile manually with no proper visibility to POS. All transactions will now be pushed to the cashbook per End of Day and reconciled once validated. Only exception need to be managed by finance

--- Changes Implemented ---

A new function has been developed to allow the automatic reconciliation of payments and transactions posted to the Transactional bank for each branch and End of Day. new Reconciliation Review has been developed to reconcile posted end of days. It will validate the end of day posting according to what has been posted to SYSPRO. If there are any errors detected, it will not reconcile until the user has resolved the issues in the Reconciliation program. to documentation for detailed information on how to use this function.

79914   **Perception: 2**

2017/02/13
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79914
New Program and Version: IMP012 (7.0.117)
Release Notes read as follows:

--- Synopsis ---
When you ran the Structures & Routings program and added an operation, you got a work center is not on file error message after entering an invalid or partial work center code and then clicking browse

--- Details of Problems Experienced ---
When maintaining operations in Structures and Routings, if you type in the Work Center field then use the browse button, an error is returned: Not on file. This is inconsistent with other browsable fields where you can filter your results by typing the first few characters then clicking the browse icon.

--- Changes Implemented ---
When maintaining operations in Structures and Routings, if you type in the Work Center field then use the browse button, the browse will open and no error will be returned. If you enter an invalid work center and tab or click off the work center field, then focus will be reset on the work center until a valid code is entered.

79342   **Perception: 2**

2/27/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79342
New Program and Version: IMPFRO (7.0.204)
Release Notes read as follows:

--- Synopsis ---
If you drag a field from one form to another, and then 'hide' the form field in the other form, then it does not remain hidden and will re-appear again when next you open the program.
--- Changes Implemented ---
The characteristic of the form field being 'hidden' is correctly saved in the form XML file, BUT that property was not being applied when the form is re-created when next the program is opened.This has been corrected.

SYSPRO 7 Update 1 Port:023

79182   **Perception: 2**

2017/02/21
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 79182
New Program and Version: BOMPCO (7.0.023)
New Program and Version: BOMPM1 (7.0.011)
Release Notes read as follows:

--- Synopsis ---
Against an ECC user you have an option ECC system administrator which was not applied in the ECC module

--- Details of Problems Experienced ---
Against an ECC user you have an option ECC system administrator which was not applied in the ECC module.

--- Changes Implemented ---
The ECC Change Order Maintenance program has been changed to apply the ECC system administrator option. When the ECC Change Order Maintenance program is loaded, the user against the operator is used to pick up whether the user is an ECC system administrator or not. If the user is associated with more than one user, the user against the operator will be used for checking the ECC system administrator option. When the user is an ECC system administrator then the manual options listed here will be available regardless of whether you have set the manual options on against the status code or not. equal the manual options you can select against a status code: Manual addition of affected items; Manual locks to be applied; Manual release of locks; Manual change of responsible user; Manual change of date available; Manua enabling of structure maintenance; Manual confirmation of structure changes; Manual cancellation of structure changes; Manual unsetting of ECC control exceptions: If you do not have authority for a status then the manual options will not be available. If structure maintenance is already enabled then this manual option will be disabled. If structure maintenance has not been enabled then the manual options to confirm or cancel structure changes will be disabled. error has also been corrected where if you do not have the manual change of responsible user set and you are not an ECC system administrator, then the responsible user field is now disabled. error has also been corrected where if you do not have the manual change of date available selected and you are not an ECC system administrator, then the expected available date is now disabled. the ECC Status Code Maintenance program, the manual change of description option has been disabled and will always be selected. It is also now hidden by default. The reason for this change is that the only method of adding a description is manually.

Event: 77635
New Program and Version: SYSPRO.SOR.QUICKENTRY.ESPRESSO.DLL (7.0.000)
New Program and Version: SYSPRO.SOR.STANDARD.ESPRESSO.DLL (7.0.016)
New Program and Version: _EV_78246 (7.0.)
New Program and Version: _EV_78950 (7.0.)
Release Notes read as follows:

--- Synopsis ---
This application was created to extend the sales order experience directly to your customers in terms of flexibility, efficiency, ease and speed of capturing orders online.
--- Reason for enhancement ---
This application was created to extend the sales order experience directly to your customers in terms of flexibility, efficiency, ease and speed of capturing orders online. It provides mobility on the road, should improve the customer ordering experience and was designed to solve a problem in the market.
--- Details of enhancement ---
The Xpress Cart can be used to conduct direct comparisons, where differences are highlighted in red. Stock codes can be categorized into buckets based on various criteria, such as unit of measure, product class or product group - this functionality is completed configurable. For example, bicycle accessories can be categorized together. However, only one category (not multiple) can be specified at a time, with its'€™ relevant sub-divisions.
--- Where would I see this change? ---
In SYSPRO Espresso the Xpress Cart application.

SYSPRO 7 Update 1 Port:023

76823   **Perception: 1**

2017/02/13
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 023
Event: 76823
New Program and Version: INVQG9 (7.0.000)
Release Notes read as follows:

--- Synopsis ---
New query business object attaching inventory movements from warehouse to another warehouse depending on entry type. Compile all movement transactions allocated to a stock code.
--- Reason for enhancement ---

SYSPRO 7 Update 1 Port:023

Legend:

5 - Critical. This could mean that the software will cause an unrecoverable data loss, it may have a serious financial implication to the customer, there may be a security issue, or there may be legal implications.

4 - Serious. This means that there is a remote chance of data loss, a remote chance of a financial implication to the customer, or that there is a possibility that it will affect many customers.

3 - Error. There is an error in the functionality of the program, but this will not stop the customer doing any major part of their business.

2 - Minor Error. There is a minor error in the functionality of the program, and this will not stop a customer doing any part of their business. This is likely to just be a cosmetic problem.

1 - Enhancement. This is an enhancement to the system.

0 - Ease of use. This may be something that could make life easier for the customer, or a change in the user interface for consistency or to improve usability.
