Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79506
New Program and Version: COMURG (7.0.001)
New Program and Version: IMP041 (7.0.202)
New Program and Version: SORTIC (7.0.071)
Release Notes read as follows:

--- Synopsis ---
Under certain conditions, the SO Invoice Calculation from Sales Order and SO Batch Invoicing business objects generated SQL errors and were not rolled back, causing data integrity issues

--- Details of Problems Experienced ---
Under certain conditions, the SO Invoice Calculation from Sales Order and SO Batch Invoicing business objects generated SQL errors, and were not rolled back, causing data integrity issues, specifically duplicate invoice numbers and blank invoice numbers.

--- Changes Implemented ---
This has been resolved so that if the SO Invoice Calculation from Sales Order and SO Batch Invoicing business objects generated SQL errors, rollbacks will take place, guaranteeing data integrity.

1/27/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79633
New Program and Version: _EV_79445 (7.0.)
Release Notes read as follows:

--- Synopsis ---
POS: Serial search query is complicated to maintain

--- Details of Problems Experienced ---
The serial query was tough to work with to establish root cause of incorrect serial qty being displayed during a search.

--- Changes Implemented ---
The query has been changed so that it is simpler to maintain going forward. Slight changes were made so that it is simplified but still returns the same results.

79525   **Perception: 4**

2017/01/27
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79525
New Program and Version: IMP040 (7.0.325)
New Program and Version: SORTOX (7.0.032)
Release Notes read as follows:

--- Synopsis ---
When you cancel a sales order, the outstanding order values for a customer were updated incorrectly and this had an effect on their credit limit.

--- Details of Problems Experienced ---
When you cancelled a sales order, the Sales Order Entry program was updating the outstanding order value for the entered customer, in some cases causing this value to be negative. This allowed for more orders to be processed than the customer's credit limit should allow.

--- Changes Implemented ---
The Sales Order Entry program will now no longer update the customer's outstanding order value incorrectly when you select to cancel a sales order.

2017/01/27
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79430
New Program and Version: COMFND (7.0.043)
New Program and Version: COMFTR (7.0.011)
New Program and Version: _EV_79635 (7.0.)
Release Notes read as follows:

--- Synopsis ---
Using the Predictive Search functionality in SYSPRO caused the WCF Service to claim and not release a lot of memory.

--- Details of Problems Experienced ---
Using the Predictive Search functionality in SYSPRO created a memory leak on the WCF service.

--- Changes Implemented ---
The business object filter utility program has been changed to clear out memory used for translation. Additionally the Generic Find business object was using language translation unnecessarily, and has been updated to only do it when necessary.

SYSPRO 7 Update 1 Port:022

2017/01/30
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 78985
New Program and Version: IMPFR2 (7.0.096)
Release Notes read as follows:

--- Synopsis ---
In the OnButtonClick event, and when calling a SYSPROBrowseToRun program, and if there's a multiline field in the same form then the browse will execute but it will not return the selected value.

--- Details of Problems Experienced ---
In the OnButtonClick event, and when calling a SYSPROBrowseToRun program, and if there's a multiline field in the same form, and if that field contains characters, then the browse will execute but it will not position the selected value back on the correct form field.

--- Changes Implemented ---
The fault was introduced in a previous port where characters in multiline fields are now converted to 'VBCRLf' constant values. This in turn caused the script engine to return NOTES fields as changed values - even when they were not changed - and this in turn interferred with the returned browse value.

78880   **Perception: 4**

2016/12/15
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022

New Program and Version: TPMPROMO.PRO (7.0.)
New Program and Version: TPMTAP (7.0.012)
New Program and Version: TPMUQP (7.0.037)
Release Notes read as follows:

--- Synopsis ---
e.net: Sales order created via SORTOI using TPM was taking a very long time to process.
--- Details of Problems Experienced ---
Sales order created via SORTOI using TPM was taking a very long time to process.
--- Changes Implemented ---
TPM promotions business objects were changes to improve performance when checking proimotions on file, to determine
if they qualify for each sales order line. In addition, if TPM lines are added to the order for a sales order line, the process of
re-sequencing all subsequent sales order lines was improved.

78627   **Perception: 4**

2017/01/27
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 78627
New Program and Version: SALQ60 (7.0.009)
Release Notes read as follows:

--- Synopsis ---
When you ran the Sales History report on certain data, the report produced duplicate entries.
--- Details of Problems Experienced ---
When you ran the Sales History report, on Salesperson part key sequence, the report produced duplicate entries. This was
caused by the Salesperson table join in SQL not using the branch code to join the salesperson.
--- Changes Implemented ---
The business object SALQ60, was updated to use a compound key join for the salesperson. This eliminates the duplicate
entries.

Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 77086
New Program and Version: CMSQDL (7.0.007)
Release Notes read as follows:

--- Synopsis ---
e.net: The Contact Dynamic List Query sometimes returned fewer entries than specified in the 'MaxItemsToReturn'
element. This occurred when access to information such as AR Branch is restricted.

--- Details of Problems Experienced ---
e.net: The Contact Dynamic List Query sometimes returned fewer entries than specified in the 'MaxItemsToReturn'
element. This occurred when access to information such as AR Branch is restricted. you select the number of rows to
return when using COMQDL to query customers, accounts or suppliers the security filtering was not being accounted for in
the selection but was being applied after the rows were returned from SQL. meant that if you enter 50 in the element
'MaxItemsToReturn' then SQL would issue the statement with a TOP 50 prefix, however the operator security access
would then further filter these rows, this could result in zero rows being returned. and filtering access is applied to the
following:CMS Account: A/R Branch; Account type and SalespersonCustomer: A/R Branch and SalespersonSupplier: A/P
Branch information is also filtered on the following if the information is being returned: Contact property; Contact class;
Contact type; Contact category and Contact territory

--- Changes Implemented ---
Instead of checking the security, access on entities such as A/R Branch on return to the object these checks are now part
of the select statement passed to SQL. This ensures that so long as there are valid rows to return the object returns these.

New Program and Version: HEALTHCHECKSQLSTDINDEXES.SQL (7.0.004)
New Program and Version: HEALTHCHECKSQLSTDTABLESCOLUMNS.SQL (7.0.004)
Release Notes read as follows:

--- Synopsis ---
The SQL health check functionality available from the SQL Server Diagnostic Utlity (IMPDG6) had several minor issues
when verifying SYSPRO tables, columns and indexes.

--- Details of Problems Experienced ---
The SQL health check functionality available from the SQL Server Diagnostic Utlity (IMPDG6) had several minor issues
when verifying SYSPRO tables, columns and indexes. Also the processing of some of these checks were slow. issues
were: check was performed on Timestamp columns to ensure that the data type was correct - there have been occasions
where a database has been copied using DTS and the timestamp columns are changed to a binary data type. defined
columns in SYSPRO tables were sometimes being seen as standard columns and were incoorectly being checked for
matching datatype and collation. Certain data types were not being setup correctly for comparison - nchar/nvarchar were
calculating the incorrect size for comparison, new sql 2016 columns were not included (datetime2, time, datetimeoffset)
and varchar(MAX) was not set correctly. These datatypes can be defined against user defined columns. between
varbinary(MAX) would always return a mismatch. were returned as user defined tables. system tables were being seen as
user defined. mismatch error was returned for standard indexes which were missing. mismatch error was returned for user
defined indexes. Custom form tables used in MRP to contain columns for suggested jobs were incorrectly being identified
as user defined custom form tables ('MrpSugJobAlLab+','MrpSugJobAlMat+','MrpCoProducts+').

--- Changes Implemented ---
The SQL health check functionality has been changed to address these issues. Also the overall speed of these checks
has been improved.

2017/01/30
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79725
New Program and Version: IMPBP1 (7.0.099)
Release Notes read as follows:

--- Synopsis ---
If you have an editable data grid in a customized pane and the VBScript injects field values that contain characters, then
such characters will be stripped out from the XML stream.

--- Details of Problems Experienced ---
If you have an editable data grid in a customized pane and the VBScript injects field values that contain characters, then
such characters will be stripped out from the XML stream. The result is that the value is shown correctly in a multiline
layout, BUT when editing the field the value is shown on a single line rather than with carriage returns.

--- Changes Implemented ---
The system has been changed to convert a single character to be after the XML stream has been parsed.

Release Notes read as follows:
--- Synopsis ---
There is a requirement for a minor database upgrade for SYSPRO 7 Update 1. This consists of 7 new tables.
--- Details of Problems Experienced ---
SYSPRO 7 Update 1 minor database upgrade 0006 has been developed. This primarily consists of 7 new tables. A set of SQL scripts to upgrade your SQL Server database has been supplied and will be run automatically when the software is first loaded. of these tables are described by MAC record layouts and the data dictionary has been updated to support these together with the SQL file handlers for developers. The other three tables are exclusively used by SQL Server systems.
--- Changes Implemented ---
Once you have installed this upgrade when you next login the database upgrades will be applied. This consists of a script to update your system-wide database and for each company a script to update each companny-specific database. The new versions will be set to '7.0.1.0006'.

2017/01/27
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79578
New Program and Version: SORP32 (7.0.038)
New Program and Version: SORP36 (7.0.025)
Release Notes read as follows:

--- Synopsis ---

If you loaded Dispatch Notes from Sales Order Query, completed dispatch notes were not loaded by default, even if the Include option for Complete dispatch notes was selected

--- Details of Problems Experienced ---

If you loaded Dispatch Notes from Sales Order Query, completed dispatch notes were not loaded by default, even if the Include option for Complete dispatch notes was selected.in the Include window, a Save button has now been added so that users can save the Include options.There was also an error in Dispatch Note Query, if you loaded a dispatch note, then opened and saved the Preferences, you received an error.

--- Changes Implemented ---

This has been corrected so that if you load Dispatch Notes from Sales Order Query, completed dispatch notes will be loaded by default, if the Include option for Complete dispatch notes is selected.If however, you load Dispatch Notes from the Dispatch Note Query, the Preferences are passed from the query to the browse and these take precedence, the Preferences in Dispatch Note Query will need to be set to the the same as Dispatch Notes.The error saving Preferences in Dispatch Note Query was resolved.

2017/01/26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79530
New Program and Version: SYSPROMA_SEARCH.DLL (7.0.007)
Release Notes read as follows:

--- Synopsis ---

Error dialog would popup when the search configuration included a custom(+) table. The error is not recoverable & causes Syspro to close unexpectedly.
--- Details of Problems Experienced ---

When a custom table is added to the Enterprise Search configuration, user searches thereafter cause an error dialog to popup in Syspro. On closing the dialog, Syspro would close unexpectedly.
--- Changes Implemented ---

The error was occuring due to the code not fetching friendly column descriptions for custom table columns. This caused a null exception when a custom table returned results. The code was fixed to use column names as captions when displaying custom table results.

2017/02/03
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79448
New Program and Version: IMPFRO (7.0.203)
Release Notes read as follows:

--- Synopsis ---

Allow the system to pre-configure a docking layout for an application where a standard Web View has been applied.

--- Changes Implemented ---

When an application is loaded for the first time and if the following conditions are true:
. A standard Web View is available (in the SAMPLES folder), and
. The option â€˜Enable standard Web Viewsâ€™ is switched on, and
. A Web View does not exist for the docking layout, and
. You are not logged in under a role the system will apply a pre-configured docking layout if it exists (in SAMPLES as UX_APP_xxxxxxLZ.XML). This allows SYSPRO to ship pre-configured layouts when Web Views are in use. this docking layout is not found and if the option 'Enable minimalist user interface' is switched on, then all panes (with the exception of the Web View itself) will be shown as 'closed'.

79441   **Perception: 3**

2017/01/30
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79441
New Program and Version: IMPFRX (7.0.013)
Release Notes read as follows:
--- Synopsis ---
Translated custom columns not added correctly to a list view.
--- Details of Problems Experienced ---
If you add a custom column to a list view and if translation is in use (that is, if the system is not in English), then the custom
column added will contain a link to the translated custom column key type and not a link back to the original English name.
The result is that when populating such a list view a BULK INSERT error is given by SQL Server.
--- Changes Implemented ---
When adding translated custom columns the original English name is stored in the saved list view XML file. : Any
previously added custom columns using translation will first have to be removed, then re-added.

Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79244
New Program and Version: QOTP1A (7.0.089)
Release Notes read as follows:

--- Synopsis ---

When you ran Quotation Entry and added a stocked line, if you changed the quote status to ready for printing while the line was in edit mode, the offer pane remained enabled

--- Details of Problems Experienced ---

When you ran Quotation Entry and added a stocked line with any quantity and an offer and then you saved the line. If you double clicked the line to maintain it then changed the quantity, thereafter change the quote status to ready for printing while the line was in edit mode, the offer pane remained enabled and if you clicked save another stock code was added.

--- Changes Implemented ---

In Quotation Entry, you have a stocked detail line and you double click to maintain the line. You change the quotation status from Prepartion to Ready for printing, the Offers pane becomes disabled and you can no longer make any changes.

Release Notes read as follows:

--- Synopsis ---
When you ran AR Customer Maintenance, the ArControl record was occasionally being zeroised.
--- Details of Problems Experienced ---
When you ran AR Customer Maintenance, the ArControl record was occasionally being zeroised.
--- Changes Implemented ---
When you run AR Customer Maintenance, if there are zero values for all the ArBalance fields on the control record, an
error message is displayed and the transaction is rolled back. This prevents the ArControl record from being zeroised
unless the option to override is selected.

SYSPRO 7 Update 1 Port:022

79120   **Perception: 3**
1/6/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79120
New Program and Version: IMPFND (7.0.079)
Release Notes read as follows:

--- Synopsis ---
Key Serach: When you press the 'More lines' button then the program appends the current displayed results on listview to itself.

--- Details of Problems Experienced ---
Key Serach: When you press the 'More lines' button then the program appends the current displayed results on listview to itself. I.e. if rows 1-10 are displayed and the user presses 'More lines' button, rows 1-10 are repeated multiple times instead of expected rows 11-20, etc. being displayed.

--- Changes Implemented ---
Key Search program now appends the next (n) rows to the listview when the 'More items'' button has been pushed.

79079   **Perception: 3**

2016/12/13
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79079
New Program and Version: WIPPKI (7.0.054)
Release Notes read as follows:

--- Synopsis ---
In Job Issues, if you performed a kit issue without the review, if the stock code did not exist, you were thrown out of the program
--- Details of Problems Experienced ---
In Job Issues, if you performed a kit issue without the review, if the stock code did not exist, you were thrown out of the program.
--- Changes Implemented ---
The WIP Job Issues program has been changed so that if you perform kit issue without the review and for some reason the stock code no longer exists, this allocation is ignored. you review the allocations because you are notified of any issues you will not be able to continue when an invalid stock code exists against an allocation.

79077   **Perception: 3**

1/9/2017
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79077
New Program and Version: _EV_77089 (7.0.)
Release Notes read as follows:

--- Synopsis ---
In the Display Style of a component in either the application builder in Espresso or when in edit mode on the manage components tab on a phone the top options are cut off.

--- Details of Problems Experienced ---
When you try to change the Display Style of a component in either the application builder in Espresso or when in edit mode on the manage components tab on a phone the top options such as inline and link are cut off because the list is too long to fit on the screen.

--- Changes Implemented ---
Updated Espresso so only the top seven options are shown in the Display Style list when used on a phone while on any other device all 13 are shown.For more specific Display Style options (Such as Side by Side Stacked) when designing an application, either a browser, tablet or the Espresso Application Designer inside SYSPRO must be used rather than directly on a phone.

2017/01/27
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79065
New Program and Version: WIPTRK (7.0.002)
Release Notes read as follows:

--- Synopsis ---
When you did partial job receipts and you were tracking component lots to parent lots, you could not track the full issue quantity. You could also not track different component lots issued

--- Details of Problems Experienced ---
When you did partial job receipts and you were tracking component lots to parent lots, you could not track the full issue quantity. You could also not track different component lots issued. The same issues exist for serials.

--- Changes Implemented ---
The WIP Track Lots and Serials program has been changed so that you can track partial receipts. The specific changes are as follows: the same lot is issued more than once then the lot is consolidated in the tracking listview which means the full issue quantity of the component lot can be tracked. multiple bins is in use then the consolidation is done against the lot/bin combination. a different lot is issued for a component after tracking has occurred means you can now track the new lot issued to the receipt. a quantity has been tracked the quantity available is now updated to reflect the quantity outstanding to track. Important note: The auto populate options only apply to rows in which tracking has not already occurred. A lot tracked is easily identified with the issue date column populated. same changes have been made for serials.

SYSPRO 7 Update 1 Port:022

78544   **Perception: 3**
12/14/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 78544
New Program and Version: WIPPKI (7.0.054)
Release Notes read as follows:

--- Synopsis ---
When you ran the WIP Job Issues program and selected to print the kit issue document, the dates output did not use the company date format

--- Details of Problems Experienced ---
When you ran the WIP Job Issues program and selected to print the kit issue document, the dates output did not use the company date format.

--- Changes Implemented ---
The WIP Job Issues program has been changed so that when you print the kit issue document, the job start date, job delivery date, kit date and queue date output are now in the company's short date format. Factory Scheduling in use and applying scheduled dates and printing the kit issue document, the scheduled start date is now output against the operation queue date and not the scheduled end date.

78475   **Perception: 3**
2017/01/30
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 78475
New Program and Version: IMPFRB (7.0.028)
New Program and Version: IMPMEN (7.0.185)
Release Notes read as follows:

--- Synopsis ---
The SYSPRO web browser control defaults to Internet Explorer 7 compatibility mode and therefore makes some web pages not display or work correctly.

--- Changes Implemented ---
The Microsoft web browser control defaults to IE7 emulation mode. However, by applying a setting to the registry it is possible to make the browser control emulate any version of IE, including IE11. now, when SYSPRO starts up it will, by default, create new registry entries that will indicate to the web browser control to default to IE11 compatibility mode. These new entries reside in:HKEY_LOCAL_MACHINE (or HKEY_CURRENT_USER), SOFTWARE, Microsoft, Internet Explorer, Main, FeatureControl, FEATURE_BROWSER_EMULATION,
SYSPRO.exe = (11000) version
SYSPROClient.exe = (11000) version , it's possible that a user might still wish SYSPRO to use IE7 compatiblity mode. You can do this by unchecking the option "Web Browser emulates highest IE version" in the System-wide Personalization program. If this option is unchecked then SYSPRO will remove the SYSPRO.exe and SYSPROClient.exe entries from the registry.

78407   **Perception: 3**

2017/01/27
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 78407
New Program and Version: IMPFRO (7.0.203)
New Program and Version: REPORT05.WRK (7.0.)
New Program and Version: REPORT08.WRK (7.0.)
New Program and Version: WIPPE3 (7.0.071)
Release Notes read as follows:

--- Synopsis ---

Within WIP Material Allocations Browse, when filtering by a column, then changing an item, the incorrect item is selected.

--- Details of Problems Experienced ---

Within WIP Material Allocations Browse, when filtering by a column, then changing an item, the incorrect item is selected. This applies to the zoom, details, lots and all other issues which require an item to be selected to make changes, or even delete an item. , if you switch off FILTER BY COLUMN it causes an OnRowSelected event to fire which may affect a VBScript trapping this event.

--- Changes Implemented ---

The problem with browse-style programs (of which WIPPE3 is one) is that they rely on the list view rows remaining intact. If rows are made invisible by doing any filtering then when you come to do maintenance on a line the incorrect key for that line is passed through to the maintenance routine. solution is that filtering is not allowed or appropriate for any browse-style program and any filtering options will be disabled. , switching off FILTER BY COLUMN will not cause an OnRowSelected event to fire.

Event: 77089
New Program and Version: SYSPROESPRESSOX64.EXE (7.0.015)
Release Notes read as follows:

--- Synopsis ---
When you manually press tab on an entry field at the bottom of an entry form in Espresso the scroller in Espresso becomes locked.
--- Details of Problems Experienced ---
When you manually press tab on an entry field at the bottom of an entry form in Espresso that is longer than the height of the browser or device the scroller in, Espresso becomes locked at that point and you can no longer scroll to the top again.
--- Changes Implemented ---
Updated SYSPROEspressox64.exe so that when a tab occurs at the bottom of an entry form in Espresso that is longer than the height of the browser or device, the browser now manually scrolls down so that the offset does not occur, Basically moving the entry field up from where it appears. This could cause unexpected consequences, also added a configuration in the web.config of Espresso, so that it can be turned off if not required (For customers with Entry forms that are all short).

Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 77063
New Program and Version: REPPZ2 (7.0.016)
Release Notes read as follows:

--- Synopsis ---
When you used the Report Writer Data Dictionary Import to update table definitions after converting from 6.1 to SYSPRO 7 it was possible for duplicate key errors to occur.

--- Details of Problems Experienced ---
When you used the Report Writer Data Dictionary Import to update table definitions after converting from 6.1 to SYSPRO 7 it was possible for duplicate key errors to occur. is due to the changes made to some column names where the case of the column was inconsistent and therefore changed in SYSPRO 7. An example of this is the Salesperson column in SalHistortMaster being changed to SalesPerson for consistency

--- Changes Implemented ---
The Report Writer Data Dictionary Import has been changed to ensure that it caters for column names that have had the case changed due to inconsistencies

Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79483
New Program and Version: ESPSRC (7.0.002)
Release Notes read as follows:

--- Synopsis ---
When using the Search Configiration program to add a search criteria using a double closing parenthesis, the program incorrectly changes it to a single bracket.
--- Details of Problems Experienced ---
When using the Search Configiration program to add a search criteria using a double closing parenthesis, the program incorrectly changes it to a single bracket. This causes incorrect search results as well as Predictive Search errors.
--- Changes Implemented ---
The Search Configiration program has been changed to ensure that double parenthesis can be saved for the closing parenthesis column.

79453   **Perception: 2**

2017/01/27
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79453
New Program and Version: _EV_79445 (7.0.)
Release Notes read as follows:

--- Synopsis ---
POS: Date format in PoS error and debug logs are not standardized
--- Details of Problems Experienced ---
The date formats in PoS for creating log files, writing to log files and posting to SYSPRO was not standardized to a specific format. In some scenarios for example writing to the log files it used a 12 hour clock which makes it hard to distinguish between 1 AM and 1 PM.
--- Changes Implemented ---
PoS has been changed to use standardized date formats throughout the system and also to use a 24 hour clock so 1 AM will be displayed as 01:00 and 1 PM will be displayed as 13:00 when writing to logs

Event: 79324
New Program and Version: IMPBGR (7.0.047)
Release Notes read as follows:

--- Synopsis ---
When you load the GRN Browse for matched GRN's, the matched GRN's both have the same journal value in the A/P journal number and Journal fields

--- Details of Problems Experienced ---
When you load the GRN Browse for matched GRN's, the matched GRN's both have the same journal value in the A/P journal number and Journal fields.

--- Changes Implemented ---
GRN's for Supplier Browse, GRN Matched Transactions listview was corrected to display the correct Journal and A/P Journal numbers.

79156   **Perception: 2**

12/15/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79156
New Program and Version: PORTRI (7.0.007)
Release Notes read as follows:

--- Synopsis ---
The Purchase Order Inspection Reversal program was checking for duplicate GRN's when the purchase order option is selected, when in fact it should be on file.

--- Details of Problems Experienced ---
The Purchase Order Inspection Reversal program was checking for duplicate GRN's when the purchase order option is selected, when in fact it should be on file.

--- Changes Implemented ---
The Purchase Order Inspection Reversal program has been changed to check that the GRN exists when the purchase order option is selected, rather than assume it's going to be new.

79091   **Perception: 2**

12/14/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 79091
New Program and Version: APSQ30 (7.0.003)
New Program and Version: AP_RELEASE_SCHEDULE (7.0.003)
Release Notes read as follows:

--- Synopsis ---
The AP Release Schedule program was not SQL optimized. The filtering options range and list were unavailable.

--- Details of Problems Experienced ---
There was a requirement for the AP Release Schedule program to be SQL optimized as well as filtering options to have range and list included. Prior to these changes you could not select a range for supplier class selection and branch selection, and you could not define list for supplier selection, supplier class selection, and branch selection.

--- Changes Implemented ---
The list and range filter types have been included where they were not available in the respective sequences. The AP Release Schedule program has been SQL optimized.

78950   **Perception: 2**

2017/01/27
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 022
Event: 78950
New Program and Version: ESPRESSO_APPLICATIONLAYOUTS.XML (7.0.)
New Program and Version: ESPRESSO_APPLICATIONS.XML (7.0.)
New Program and Version: ESPRESSO_COMPONENTLAYOUTS.XML (7.0.)
New Program and Version: ESPRESSO_COMPONENTS.XML (7.0.)
New Program and Version: ESPRESSO_KEY_FIELDS.XML (7.0.)
New Program and Version: ESPRESSO_MEDIA.XML (7.0.)
New Program and Version: ESPRESSO_SEARCHES.XML (7.0.)
New Program and Version: IMPESP.IMP (7.0.024)
New Program and Version: SYSPROESPRESSOX64.EXE (7.0.016)
Release Notes read as follows:

--- Synopsis ---
Lot Components added and the Espresso Framework required some changes to support these. Scrolling issues in Grid on devices and Media types for signature pad saving could not be configured.

--- Details of Problems Experienced ---
The Standard Xml files (Applications, Searches , Components and Application Layouts) and the version file for self healing had to be updated so that Lots are available in Espresso. Lot's will be part of the Stock Code Layout.You could not scroll inside a grid on a touch device or tablet.You could not configure the media type that Espresso saves a signature to.

--- Changes Implemented ---
Lots Query support has now been added to the standard Inventory Query application in Espresso.Fixed Scrolling in Espresso Grids when items in a page overflow the grid size for mobile/touch enabled devices.Added a postmediatype to the web.config file of Espresso that allows the user to configure the media types of Signatures that are captured in Espresso for use in things like SRS. (Change postmediatype to JPG)

--- Changes Implemented ---
In the Customer Stock Codes program you are now able to select the "Show all stock Codes" option which will display all the global interchange records.

SYSPRO 7 Update 1 Port:022

Legend:

5 - Critical. This could mean that the software will cause an unrecoverable data loss, it may have a serious financial implication to the customer, there may be a security issue, or there may be legal implications.

4 - Serious. This means that there is a remote chance of data loss, a remote chance of a financial implication to the customer, or that there is a possibility that it will affect many customers.

3 - Error. There is an error in the functionality of the program, but this will not stop the customer doing any major part of their business.

2 - Minor Error. There is a minor error in the functionality of the program, and this will not stop a customer doing any part of their business. This is likely to just be a cosmetic problem.

1 - Enhancement. This is an enhancement to the system.

0 - Ease of use. This may be something that could make life easier for the customer, or a change in the user interface for consistency or to improve usability.

09-Feb-17
