New Program and Version: SORTCI (7.0.012)
New Program and Version: SORTCU (7.0.008)
New Program and Version: SORTOX (7.0.017)
New Program and Version: TPM.WRK (7.0.)
New Program and Version: TPMPROMO.PRO (7.0.)
Release Notes read as follows:

--- Synopsis ---
When Credit Notes were applied against an invoice that generated off invoice miscellaneous lines from Trade Promotions, these did not reflect any changes made to the quantities on the parent.

--- Details of Problems Experienced ---
When Credit Notes were applied against an invoice that generated off invoice miscellaneous lines from Trade Promotions, these did not reflect any changes made to the quantities on the parent credit note lines.

--- Changes Implemented ---
Credit Off-Invoice Line Promotions from existing invoices. A new Trade Promotions setup option ï¿½Credit off invoice lines from invoicesï¿½ has been added to control the creation and updating of off invoice promotions on a credit note. When a credit note is built from an existing invoice, and this option is selected, any off invoice promotions with an off invoice allowance type of 'Line promotion' that were applied on the invoice for the credited lines are now recorded against the credit note.

These lines do not have to be selected by the user, and will be ignored if they are selected. Any maintenance on the credit note lines that copied from the invoice affects the off invoice promotions, whereas additional lines do not. When a qualifying credit note line quantity is changed, the value of the off invoice promotion miscellaneous line is reduced based on the quantity credited.This event covers the adding, maintenance and cancelling of off invoice promotions to credit notes in the SO Credit Note from Invoice, SO Credit Note Change Merchandise Line and SO Order or Line Cancel business objects.

New Program and Version: TPMPROMO.PRO (7.0.)
New Program and Version: TPMRMA.WRK (7.0.)
Release Notes read as follows:

--- Synopsis ---

When creating a credit note in RMA from an exisiting invoice, and pulling in lines that had trade promotions attached, you expected any off-invoice trade promotion miscellaneous lines to be added.

--- Details of Problems Experienced ---

When creating a credit note in RMA from an exisiting invoice, and pulling in a line or lines that had trade promotions attached, you expected any off-invoice trade promotion miscellaneous lines to be added to the credit note. This did not happen.

--- Changes Implemented ---

Credit Off-Invoice Line Promotions from existing invoices. A new Trade Promotions setup option ï¿½Credit off invoice lines from invoicesï¿½ has been added to control the creation and updating of off invoice promotions on a credit note. When a credit note is built from an existing invoice, and this option is selected, any off invoice promotions with an off invoice allowance type of 'Line promotion' that were applied on the invoice for the credited lines are now recorded against the credit note. These lines will do not have to be selected by the user, and will be ignored if they are selected. Any maintenance on the credit note lines that copied from the invoice will affect the off invoice promotions, whereas additional lines will not. When a qualifying credit note line quantity is changed, the value of the off invoice promotion miscellaneous line is reduced based on the quantity credited.This event covers the creation of miscellaneous promotion lines to RMA credit notes which contain lines which were copied from an invoice.

Release Notes for SYSPRO 7 Update 1 Port 4
Event: 70488
New Program and Version: SYSPROCRYSTALGUI.DLL (7.0.003)
New Program and Version: _EV_69984 (7.0.)
Release Notes read as follows:

--- Synopsis ---
When SYSPRO Reporting is configured to ï¿½Server-side reporting using SQLï¿½ the prompt text on some of the Crystal
parameter fields are not available due to a limitation in Crystal reports API.

--- Details of Problems Experienced ---
When SYSPRO Reporting is configured to ï¿½Server-side reporting using SQLï¿½ the prompt text on some of the Crystal
parameter fields are not available due to a limitation in Crystal reports API. This limitation results in the prompt text not
being displayed in SRS. Users of SRS would not be able to identify parameters when capturing report parameter
information before processing a report.

--- Changes Implemented ---
A change was made to SRS to check that in the case of the prompt text not being set by the Crystal API that the
parameter name is used as an alternative for the prompt text. This will allow users of SRS to identify report parameters
when capturing report parameter fields before processing a report in SRS.

New Program and Version: STD1.XML (7.0.)
New Program and Version: STD2.XML (7.0.)
New Program and Version: STD3.XML (7.0.)
New Program and Version: WIPPLP (7.0.019)
Release Notes read as follows:
--- Synopsis ---
There is no longer a browse button on the rate indicator field in Labor Posting
--- Details of Problems Experienced ---
There is no longer a browse button on the rate indicator field in Labor Posting and this causes problems when the user
needs to see the actual rates before selecting the rate indicator. The same applies to the employee rate indicator field.
--- Changes Implemented ---
The WIP Labor Posting program has been changed to have both the browse button and a drop down on the rate indicator
and employee rate indicator fields. The BOM Employee Rate Descriptions program was also changed to have the
employee rates column.

Release Notes for SYSPRO 7 Update 1 Port 4
Event: 70240
New Program and Version: BOMPWU (7.0.033)
Release Notes read as follows:

--- Synopsis ---

When you replaced a non-traceable component with a traceable component in the BOM Replace Component Where Used program, you received an error informing you of this

--- Details of Problems Experienced ---

When you replaced a non-traceable component with a traceable component in the BOM Replace Component Where Used program, you received an error informing you of this.

--- Changes Implemented ---

The BOM Replace Component Where Used program has been changed so that if the parent stock code selection filter is single and you are replacing a non-traceable component with a traceable component and the lot traceability setup option ï¿½Parent traceable if component traceableï¿½ is switched on, then so long as the parent is traceable the replacement can occur. When selecting any of the other parent stock code selection filters (All, Range or List) and the lot traceability setup option ï¿½Parent traceable if component traceableï¿½ is switched on then you can only have a lot traceable replacement component when the component to replace is lot traceable.

Release Notes for SYSPRO 7 Update 1 Port 4
Event: 68531
New Program and Version: SRSPRT (7.0.059)
Release Notes read as follows:

--- Synopsis ---
SRS Document printing - invalid characters in the XML cause the print process to fail.

--- Details of Problems Experienced ---
Invalid characters in the XML could cause the parsing of the input XML to fail or they could cause the binding of the XML to the document to fail.In both cases the document would fail to render.

--- Changes Implemented ---
The core print program SRSPRT has been changed to either ignore invalid characters below a space character or to replace the invalid character with a space.

New Program and Version: SORTOI (7.0.101)
New Program and Version: TPMBOPR.WRK (7.0.)
New Program and Version: TPMPROMO.PRO (7.0.)
New Program and Version: SORTOI (7.0.101)
New Program and Version: SORTOI (7.0.101)
Release Notes read as follows:

--- Synopsis ---
When you added a sales order using reserve rather than ship, you found that the trade promotions free goods lines were moved to ship rather than reserved

--- Details of Problems Experienced ---
When you added a sales order using reserve rather than ship, you found that the trade promotions free goods lines were moved to ship rather than reserved. In addition, any off invoice and accrual promotions were treated as if the line had beer shipped.

--- Changes Implemented ---
The Sales Order Entry and Sales Order Release Reserved Stock programs as well as the Trade Promotions Qualification utility have been changed to process reserved stock correctly. Any off-invoice and accrual promotions where the sales order line is reserved are calculated on order entry as if the stock were in back order. A sales order line added as a result of a free goods promotion is placed in reserve when the parent line is reserved and the relevant Trade Promotions option to ship free goods is selected.Off-invoice and accrual promotions are updated when the parent line is moved from reserved to ship and any associated miscellaneous line values are updated. A free goods line may only be moved from reserved to ship if sufficient of the parent line has been shipped.

Release Notes for SYSPRO 7 Update 1 Port 4
Event: 68337
New Program and Version: APSPIN (7.0.032)
New Program and Version: DIAG_INFO_APSPIN.RTF (7.0.)
New Program and Version: IMPSET.IMP (7.0.003)
Release Notes read as follows:

--- Synopsis ---
AP Invoices are being created with zero value but with no associated invoice number

--- Details of Problems Experienced ---
AP Invoices are being created with zero value but with no associated invoice number

--- Changes Implemented ---
In an attempt to trace when zero value invoices with no invoice numbers are created, we have added a new diagnostic code to APSPIN. This results in extra job logging being output to a log file showing the contents of various fields at the time of creating the invoice in the database. This process makes use of the advanced diagnostics.

19/06/2015
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 4
Event: 65626
Release Notes read as follows:

--- Synopsis ---
When you ran the Sales Order Lots, Bins, Serials Allocations program for Lot traceable items for a credit note, then you could not select a new bin to return the lot items to

--- Details of Problems Experienced ---
When you ran the Sales Order Lots, Bins, Serials Allocations program for Lot traceable items for a credit note, then you could not select a new bin to return the lot items to.

--- Changes Implemented ---
The Sales Order Lots, Bins, Serials Allocations program has been changed to allow easier selection of a different Bin for lot items when creating and maintaining credit lines. The quantity to be returned will be limited by the total quantity sold or issued in the selected warehouse across all the bins for the selected Lot.

New Program and Version: MRPP40 (7.0.081)
New Program and Version: MRPPE1 (7.0.035)
New Program and Version: MRPPE5 (7.0.004)
Release Notes read as follows:

--- Synopsis ---
Use absolute days when applying lead time to transfer supplied items
--- Reason for enhancement ---
When you apply lead time to a transfer supplied item, if the transportation of goods is handled by a third party, then there needs to be a new option to use absolute days for the lead time.
--- Details of enhancement ---
A new setup option has been added - Use absolute days when applying lead time to transfer supplied items and this option is checked and applied in those areas of the product where the lead time of transfer supplied items is being used.Important note: When the option to use absolute days when applying lead time to a transfer supplied item is switched on and a date is calculated, if this date is then used in the system and is not for display purposes only and falls on a non-working day, then the next working day will be used. In the case of the date being calculated backwards the previous working day will be used.
--- Where would I see this change? ---
In the Inventory Setup program and in all other areas of the product where the lead time of transfer supplied items is being used.

Event: 70185
New Program and Version: GENQSO (7.0.003)
New Program and Version: GENTSO (7.0.004)
Release Notes read as follows:

--- Synopsis ---

When you ran the Post GL Setup Options business object, it updated regardless of the 'Validate only' flag. In addition, the 'next journal number by period' didn't always update.

--- Details of Problems Experienced ---

When you ran the Post GL Setup Options business object, it updated regardless of the 'Validate only' flag. In addition, the 'next journal number by period' did not always update.

--- Changes Implemented ---

When you run the Post GL Setup Options business object with 'Validate only' set to 'Y', the program no longer updates the GL setup options. In addition, the 'next journal number by period' now updates correctly when set up to do so. An additional change was made as when accounting periods are set to 12, period 13 is now both reported on and updated in the GL Setup Options business objects.

New Program and Version: ARSP92 (7.0.011)
New Program and Version: ARSPEA (7.0.008)
New Program and Version: ARSPEB (7.0.008)
Release Notes read as follows:

--- Synopsis ---
A new sales order contract pricing method of Mark-up list price has been added.
--- Reason for enhancement ---
In Sales Order Contract pricing there is a contract price type of cost plus mark up. This works perfectly well in a standard costing environment where the cost is stable, however in an average cost environment the cost can frequently vary meaning it cannot be used in this type of pricing environment.
--- Details of enhancement ---
To get around this issue a new contract pricing method 'Mark-up list price' has been added where the list price, in effect, is seen as the cost, thus giving a stable base to mark up by a percentage to calculate a contract price.
--- Where would I see this change? ---

Release Notes for SYSPRO 7 Update 1 Port 004
Event: 69892
New Program and Version: BOMP3F (7.0.040)
New Program and Version: IMPPRO (7.0.028)
Release Notes read as follows:

--- Synopsis ---
The software decides if a change to the Structure and Routing within an Engineering Change Order is minor or major.
--- Reason for enhancement ---
The requirement is to enhance SYSPRO, so that minor and major change decision making is made by the Engineer not by the software.
--- Details of enhancement ---
The Bill of Material setup program now allows three options for the ï¿½Allow Cosmetic changesï¿½ to Engineering Change Orders. The options will now be: 1) No > which means no changes are cosmetic2) Automatic control > which will still allow the system to decide if the changes are cosmetic3) Manual control > which will allow the operator to decide if the changes to the Bill of Material is cosmetic or not, when updating the status for ECC controlled items.The ECC Change ECO Status program has been changed to check if the Allow Cosmetic Changes is set to ï¿½Manual controlï¿½, then the operator will be prompted to decide if the changes are cosmetic or major.
--- Where would I see this change? ---
In the Engineering Change Control module

New Program and Version: IMPTRE (7.0.016)
New Program and Version: IMPTRN (7.0.033)
New Program and Version: IMPTRO (7.0.042)
Release Notes read as follows:
--- Synopsis ---
There is a requirement to be able to restrict the available triggers when configuring e.net transactions as well as limit variables when configuring a condition for an 'add' type transaction.
--- Reason for enhancement ---
There is a requirement to be able to restrict the available triggers when configuring e.net transactions as well as limit variables when configuring a condition for an 'add' type transaction. This requires new attributes to be defined in the IMPTRN.XML file.
--- Details of enhancement ---
There is a requirement to be able to restrict the available triggers when configuring e.net transactions as well as limit variables when configuring a condition for an 'add' type transaction.Two new attributes, 'enet' and 'trntype' have been added to the individual xml definition files for each transaction and these will now be available in the latest imptrn.txt file which gets generated. These attributes are taken account of when configuring triggers and conditional logic.
--- Where would I see this change? ---
The changes can be seen when configuring triggers for e.net transactions and when configuring a condition for an 'add' type transaction.

Release Notes read as follows:

--- Synopsis ---
Interface and functionality additions to Trade Promotions Review.

--- Reason for enhancement ---
When reviewing Trade Promotions to apply rebates, specific selection and detailed documents relating to application of rebates provide tighter control over use of rebates.

--- Details of enhancement ---
The Promotion Review will have a checkbox against each accrual promotion row so that a series of rows can be selected or deselected for posting once the basic criteria have been applied. Rows can only be selected if the review is for a single customer. A review criteria option will allow all accrual rows to be marked as selected initially. This defaults to checked. The rows may be toggled between all selected and all deselected. The Balance column shows a total value in the footer of all checked rows.The grid may be sorted if required, and the rows will always be processed in the final order from the grid. A new column showing the current value of the relevant invoice has been added.Both invoices and promotions are available as a list in the options. If a single customer has been selected, then only invoices for that customer are shown. Only accrual promotions are shown in the list.A new toolbar option 'Post detail credit' is available. If this is selected, then a Sales Credit Note will be created containing a miscellaneous line for each accrual promotion that was selected for processing, and a credit invoice will be produced from that.An option to print invoices produced this way will be available in the criteria pane, with the invoices being printed in a batch at the end of processing. The invoices can also be printed or reprinted using the Sales Order Document Print process.

--- Where would I see this change? ---
Trade Promotions Review.

New Program and Version: WIPTRA (7.0.002)
Release Notes read as follows:

--- Synopsis ---

A new program called Inventory Demand Review has been written to avoid unnecessary material handling. It will allow you
to identify inbound materials and its corresponding demand from sales or jobs

--- Reason for enhancement ---

A new program called Inventory Demand Review has been written to avoid unnecessary material handling. In the past it
was cumbersome to review demand from both back ordered Sales Orders and Job Allocations then match this to on-hand.
This new program remedies this limitation and allows you to ration on-hand amongst demand arising from either back
ordered Sales Orders or Job Allocations, in a single program.

--- Details of enhancement ---

A new program called Inventory Demand Review has been written to avoid unnecessary material handling. It will allow you
to identify inbound materials and its corresponding demand from back ordered Sales Orders or Job Allocations. You may
select to ration existing stock between various demands.Allied to this enhancement, please note that the WIP Reserve
Stock for Allocations Business Object has also been changed to have two new transaction types: (I) Increase and (D)
Decrease which allow you to supply a quantity to increase/decrease reserved against an allocation.

--- Where would I see this change? ---

A new program called Inventory Demand Review has been written to avoid unnecessary material handling and may be run
from the Inventory Menu.

54753   **Perception: 1**

2015-06-24
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 4
Event: 54753
New Program and Version: QOTP20 (7.0.072)
Release Notes read as follows:

--- Synopsis ---

There is a requirement to allow users to create different types of sales orders when confirming a quotation

--- Reason for enhancement ---

When you confirm a quotation and create a sales order, you can now select what type of sales order to create.

--- Details of enhancement ---

A new dropdown list, Sales Order Type, has been added to Quotation confirmation which allows you to select what type of
sales order will be created when you select to create a sales order.

--- Where would I see this change? ---

You can see the change in Quotation Confirmation. There is a new dropdown list called sales order type.

Legend:

5 - Critical. This could mean that the software will cause an unrecoverable data loss, it may have a serious financial implication to the customer, there may be a security issue, or there may be legal implications.

4 - Serious. This means that there is a remote chance of data loss, a remote chance of a financial implication to the customer, or that there is a possibility that it will affect many customers.

3 - Error. There is an error in the functionality of the program, but this will not stop the customer doing any major part of their business.

2 - Minor Error. There is a minor error in the functionality of the program, and this will not stop a customer doing any part of their business. This is likely to just be a cosmetic problem.

1 - Enhancement. This is an enhancement to the system.

0 - Ease of use. This may be something that could make life easier for the customer, or a change in the user interface for consistency or to improve usability.
