2017/03/30

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80721**New Program and Version:** ARSPCS (7.0.072)**New Program and Version:** ARSSCS (7.0.055)

Release Notes read as follows:

--- Synopsis ---

When you printed a customer invoice and the tax system was configured as "USA AVP Sales Tax", the city was not printed on the customer invoice.

--- Details of Problems Experienced ---

When you printed a customer invoice from a sales order and the tax system was configured as "USA AVP Sales Tax", the city was not printed on the invoice. This occurred as a result of an error that existed in the Customer Maintenance. Maintained or newly added Customers would lose the City Description against the City address lines (Ship or Sold).

--- Changes Implemented ---

When you print a customer invoice from a sales order and the tax system is configured as "USA AVP Sales Tax", the city is now printed on the invoice. This correction will only be applied to newly created invoices. Customers will need to be maintained and saved with the correct extended tax codes in order to automatically update the City and State address lines (Sold and Ship). The 'Description' against the extended tax code updates the 'City' address lines and the State code against the extended tax code updates the 'State' address lines.

SYSPRO 7 Update 1 Port:024**80700** **Perception: 4**

2017/03/31

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80700**New Program and Version:** COMFND (7.0.044)

Release Notes read as follows:

--- Synopsis ---

e.net: COMFND not returning the correct custom form results

--- Details of Problems Experienced ---

When you used the business object COMFND to return information from a custom form table, but you first queried a C-ISAM table, the business object COMFND would not return the correct results for the custom form tables. This error could only happen when COMFND is called in a specific order. First the query a C-ISAM table then query a custom form table.

--- Changes Implemented ---

The program COMFND has been corrected to ensure that it returns the correct results regardless of the order in which COMFND is being called.

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80582**New Program and Version:** _EV_80348 (7.0.)

Release Notes read as follows:

--- Synopsis ---

POS: Customer movements do not show all invoices

--- Details of Problems Experienced ---

When a invoice is done without payments on the Manage Orders screen it would not show up in Customer Movements query

--- Changes Implemented ---

The program has been changed to show all invoices for the customer even if they just exist in SYSPRO

80522**Perception: 4**

3/31/2017

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80522**New Program and Version:** _EV_80348 (7.0.)

Release Notes read as follows:

--- Synopsis ---

POS: On Account payment option shows for cash customers

--- Details of Problems Experienced ---

When a cash customer has deposit orders against them then the amounts of the deposit would be included in the balance and this will then show the "On Account" option in PoS when taking payment. The branch cash customer would also allow the "On Account" option if they had credit available ie a credit note has posted but the payment has not been posted yet.

--- Changes Implemented ---

The program has been changed to subtract the PoS deposit order values for the customer and also to exclude the branch cash customer from showing the "On Account" option.

SYSPRO 7 Update 1 Port:024**80513** **Perception: 4**

2017/03/29

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80513**New Program and Version:** DISSTD.WRK (7.0.)**New Program and Version:** IMPBIK (7.0.022)**New Program and Version:** IMPTIK (7.0.010)**New Program and Version:** MSGDISEN.IMP (7.0.)

Release Notes read as follows:

--- Synopsis ---

When Dispatch note numbering method is set to 'By order' then the presentation length was not being validated against the sales order validation length to ensure that the number generated was correct.

--- Details of Problems Experienced ---

When Dispatch note numbering method is set to 'By order' then the presentation length was not being validated against the sales order validation length to ensure that the number generated was correct.

--- Changes Implemented ---

The Key Setup program and equivalent business object has been changed to ensure that when you set the dispatch note numbering method to 'By order' then the presentation length you have set is at least 5 characters longer than the sales order presentation length. This is because the dispatch generated using this numbering method is made up of the presentation of the sales order plus a '/' and a four character numeric suffix.

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80440**New Program and Version:** _EV_80348 (7.0.)

Release Notes read as follows:

--- Synopsis ---

POS: PoS uses incorrect conversion factor when list price code is not setup for stockcode in SYSPRO

--- Details of Problems Experienced ---

When the price code against a stockcode is not set up and pricing per branch is enabled in POS then the conversion factors in PoS will use the OtherUOM factor which causes posting errors due to incorrect qty calculations. PLEASE NOTE that when a stockcode is setup in SYSPRO the price code MUST be specified. When importing stock using the business object the price code can be blank which is where this problem originates from.

--- Changes Implemented ---

The program has been changed to use the correct UOM if a price code is not setup for a stock code in SYSPRO.

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80327**New Program and Version:** IOPP03 (7.0.007)

Release Notes read as follows:

--- Synopsis ---

When you transferred demand data (in this case credit notes) to the Sales Returns table in IO, certain transactions were written incorrectly for credit note history

--- Details of Problems Experienced ---

When you transferred demand data (credit notes) to the Sales Returns table in IO, it was necessary to call the program IO Post Transactions silently; this silent posting caused certain transactions to be written incorrectly to Sales Returns.

--- Changes Implemented ---

The program IO Post Transactions has been changed to correctly post the QUANTITY, COST and SALES VALUE for credit notes. The year-to-date cumulative figures were always correct though.

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80320**New Program and Version:** WIPQUERY.HTM (7.0.)

Release Notes read as follows:

--- Synopsis ---

The option to show jobs in a browser format in the Job Query no longer works correctly if the system-wide option 'Web Browser emulates highest IE version' is switched on.

--- Changes Implemented ---

The problem is that the basic HTML page (WIPQUERY.HTM) for the browser requires a lower version of IE to work. The solution was to insert a meta tag:
the HTML page.

2017/03/20

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80262**New Program and Version:** SORPS7 (7.0.048)

Release Notes read as follows:

--- Synopsis ---

Freight charge line added from Dispatch Maintenance program showed linked Requisition, Purchase Order and Job when the dispatch note invoice was queried from Sales Invoice Query program

--- Details of Problems Experienced ---

When you make a sales order, and do a dispatch note when ending the order, you go to dispatch note maintenance to maintain the order. In there you add a Freight charge line. You end the dispatch note and invoice it. When you query the invoice in Sales Invoice query program, and click on the freight charge line, it shows a linked Requisition, Purchase Order and Job. None of which belongs to the sales order or freight line. adding the freight line was added, it did not save the Sales Order number or the line number on the dispatch note detail file, thus it retrieved the wrong information when the freight line was clicked.

--- Changes Implemented ---

The dispatch note maintenance program was changed to save the sales order number and line number in the dispatch note detail file, when adding a miscellaneous line and duplicating it correctly to the dispatch note detail reprint file to give the correct information details for the freight line.

A SQL error message was displayed when posting a created permanent entry with day set as 30 in the month of February.

--- Changes Implemented ---

When you now post a created permanent entry with day set as 30 for the month of February, the date will be set to the last day of the month and no SQL error message will be displayed.

SYSPRO 7 Update 1 Port:024**80106** **Perception: 3**

2017/03/24

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80106**New Program and Version:** IMPFRO (7.0.205)

Release Notes read as follows:

--- Synopsis ---

Predictive Search does not work with the Chinese language.

--- Changes Implemented ---

There were two faults.

. The Language text file for Chinese (LANG=ZH) was using an encoding structure that was not supported by the XML parser.

. The XAML Markup to render predictive search rows was not inserting the XML encoding instruction.

Event: 80105**New Program and Version:** ARSQAJ (7.0.006)

Release Notes read as follows:

--- Synopsis ---

When you changed any customer detail fields in AR Customer Maintenance, the customer amendment journal printed additional blank entries.

--- Details of Problems Experienced ---

When you changed any customer detail fields in AR Customer Maintenance, the customer amendment journal printed additional blank entries.

--- Changes Implemented ---

The AR Customer Amendment Journal has been changed to include the printing of the new customer master file fields.

SYSPRO 7 Update 1 Port:024**80104****Perception: 3**

2017/03/22

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 80104**New Program and Version:** SORP09 (7.0.066)

Release Notes read as follows:

--- Synopsis ---

When filtering on a non-stocked warehouse, the release quantity did not update on the grid when changed

--- Details of Problems Experienced ---

When filtering on a non-stocked warehouse for a back order release and changing the release quantity of the non-stocked item, the Quantity Release did not update on the grid after the change was made, but when the Apply Release Quantity was selected, the changed amount was subtracted from the Back Order Quantity and updated.

--- Changes Implemented ---

Now, when filtering on a non-stocked warehouse and changing the release quantity of a non-stocked item, the Quantity Release is updated on the grid to the changed amount set in the Change Release Quantity window and when the Apply Release Quantity is selected, it still subtracts from the quantity on back order and updates the field to show the new quantity on back order, same as stocked items.

2017/03/09

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 79550**New Program and Version:** IMPC7A (7.0.008)

Release Notes read as follows:

--- Synopsis ---

SYSPRO 7 Conversion - You can convert a 6.1 Company to SYSPRO 7 when the company control record points to an invalid data path.

--- Details of Problems Experienced ---

There is any issue in SYSPRO where you can change a company control file to point to an alternative data path defined in the IMPACT.INI. If you then remove the path from IMPACT.INI there is no check to make sure that the control file is corrected. In this scenario you could have some ISAM files in the data directory that are not converted because the system will not be able to find the file.

--- Changes Implemented ---

The SYSPRO 7 conversion program has been changed to check for a blank data path before starting the conversion. If a blank data path is found then the conversion will be stopped until the company control table has been corrected.

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 77203**New Program and Version:** IMPC7B (7.0.017)**New Program and Version:** _EV_80014 (7.0.)

Release Notes read as follows:

--- Synopsis ---

SYSPRO 7 Conversion - The Store and create custom database objects program does not check the BCP folder for a trailing slash.

--- Details of Problems Experienced ---

When converting a SQL company from 6.1 to 7 there is a process that checks the company database and stores user created objects as well as control tables for the conversion. This process does not find the BCP path defined against the system setup if that path is a UNC path and has been saved without a trailing slash.

--- Changes Implemented ---

The Store and create custom database objects program has been changed to check the BCP path for a trailing slash. This is done regardless of whether the path is a UNC path or not.

Event: 75200**New Program and Version:** DISSTD.WRK (7.0.)**New Program and Version:** INVPST (7.0.069)**New Program and Version:** INVPWS (7.0.027)**New Program and Version:** INVSST (7.0.052)**New Program and Version:** INVSWS (7.0.025)**New Program and Version:** MSGDISEN.IMP (7.0.)

Release Notes read as follows:

--- Synopsis ---

INVPWS - Stock code warehouse maintenance was allowing for a zero fixed time period to be saved as well as INVPST. This however was not allowed in the business objects INVSWS and INVSST.

--- Details of Problems Experienced ---

INVPWS - Stock code warehouse maintenance was allowing for a zero fixed time period to be saved when the item was selected as a transferable item, using the warehouse replenishment rule, and using a time based replenishment rule [C,K,L,M,N] - Fixed time period. This is an error, as a fixed time period cannot be zero days when using a time based buying rule. INVPST- Stock code maintenance was also allowing for a zero fixed time period to be saved when the replenishment rule was selected to be a time based rule. INVSST and INVSWS both did not allow for these fields to be zero when using these business objects.

--- Changes Implemented ---

INVPWS and INVPST was changed to validate the Fixed time period (days) field when saving, and displaying a warning message to say that a value of one is assumed when a value of zero was detected. INVSWS and INVSST was changed to also return that warning message when a zero was entered. and sample XML instances are available in the SYSPRO e.net solutions Business Objects Reference Library.

Release Notes read as follows:

--- Synopsis ---

The Advanced Trial kitting programs excludes a Material allocation for an ECC controlled item with an ECC consumption method of spaces

--- Details of Problems Experienced ---

When the ECC option to 'Deplete oldest Revision/Release first' is switched on and there are some WIP Material allocations against an existing job, then the ECC consumption flag for these existing material allocations might be left as spaces instead of being set to 'S' for Specified. If you then run the Advanced Trial kitting program where this WIP allocation must be included as a demand on the component, then it is not included since the ECC consumption flag is spaces.

--- Changes Implemented ---

The Advanced Trial kitting programs have been changed to ensure that a material allocation for an ECC controlled stock item that has an ECC consumption method of spaces, will now be treated similar to when the ECC consumption has been set to Specified.

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 79101**New Program and Version:** INVQBS (7.0.003)

Release Notes read as follows:

--- Synopsis ---

The health check to check whether the quantities against sales orders are all in balance with the relevant inventory quantities has been extended to include the quantity dispatched.

--- Reason for enhancement ---

The quantity dispatched but not invoiced is required as part of the check that compares the sales quantities with those in inventory to complete the functionality.

--- Details of enhancement ---

The health check business object now compares the quantity dispatched but not invoiced on all active sales order lines and compares this with the quantity dispatched in inventory. object also returns information on how many active dispatch lines exist for an item as well as how many are currently being processed.

--- Where would I see this change? ---

When running the health check business object and choosing to compare sales to inventory quantities then any imbalances between the dispatch quantities is now returned.

There was a requirement for the AR Period End program to have separate functions for balancing and month/year end functions.

--- Details of enhancement ---

A new business object has been written to perform the balancing function. The AR Period End program has been modified to call this business object to perform the balancing function. Minimal balancing will still be done during a month/year end.

--- Where would I see this change? ---

A new business object has been written to perform the balancing function. The AR Period End program has been modified to call this business object to perform the balancing function. Minimal balancing will still be done during a month/year end.

78490**Perception: 1**

2017/03/24

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 78490**New Program and Version:** DISSTD.WRK (7.0.)**New Program and Version:** INVTBS (7.0.000)**New Program and Version:** MSGDISEN.IMP (7.0.)

Release Notes read as follows:

--- Synopsis ---

Business object to compare and balance inventory quantities against the equivalent sales order quantities.

--- Reason for enhancement ---

Currently the corrections for balancing issues requires you to run the balancing functions in the relevant modules and most of these take a substantial amount of time and process functions which are actually not necessary (for example the calculation of inventory valuation in the inventory balance function). is therefore a requirement to provide a suite of business objects that will quickly correct, where possible, balancing issues found by the health check queries.

--- Details of enhancement ---

A new business object, INVTBS, has been written which, in a SQL environment, will correct out-of-balance issues between Inventory and the equivalent sales order quantities. object applies the same corrections to the inventory quantities as is performed by the option 'Validate inventory quantity allocations' and 'Balance serial tracking quantity available' in the Sales Order Purge.

--- Where would I see this change? ---

This will form part of the health check suite of business objects and will also be integrated into the Sales Order Purge program in SYSPRO.

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 76707**New Program and Version:** COMQPG (7.0.000)

Release Notes read as follows:

--- Synopsis ---

There is a need for a business object to expose all the programs in SYSPRO and files that each program uses to the end user.

--- Reason for enhancement ---

Com Query SYSPRO Programs was developed to expose to the end user all the programs used by SYSPRO as well as all the files/ tables that each program uses. There are several options and filters to help getting only the required results

--- Details of enhancement ---

The Com Query SYSPRO Program program is a new business object.

--- Where would I see this change? ---

Because this is a business object it is not available from SYSPRO menu but it is available in a business object library.

Release Notes read as follows:

--- Synopsis ---

SYSPRO did not integrate with Office 365

--- Reason for enhancement ---

There is an increasing requirement for Office 365 support in SYSPRO.

--- Details of enhancement ---

A platform to integrate with Office 365 was added to the SYSPRO architecture. following is supported:

Emailing and resolving of email addresses

Browsing contacts for email addresses

Exporting Excel files to Excel in the cloud (Office 365) from grids/listviews

--- Where would I see this change? ---

In the System Setup program, an Office Integration tab was added to capture Office 365 settings. viewing emails from contact management, the email will be opened in Office 365. SRS if you have selected email as an output option and you are using Office 365, when you browse on To, Cc or Bcc email addresses you will be browsing on the contacts you have defined in Office 365. you export information from a grid or listview to Excel, it will use Office 365 Excel. :When selecting the email address link from CMSPEN, you will receive a warning message " you must have SYPRO Email Client application installed .. " this will be corrected in the next port.

Release Notes for SYSPRO 7 Update 1 Port 024

Event: 49875**New Program and Version:** WIPJLS (7.0.000)

Release Notes read as follows:

--- Synopsis ---

When you reserved lots and serials for a job or allocations, then the old screen-set was used.

--- Reason for enhancement ---

When you reserved lots and serials for a job or allocations, then the old screen-set was used.

--- Details of enhancement ---

The WIP Reserve lots & Serials Maintenance program has been changed to use the new screen-set functionality. The Reserve Lots and Serials Maintenance view has been changed to present the user with two new editable listviews – one for the Reserved Lots and one for the Reserved Serials. capturing Reserved Lots and Serials from Job Entry, as an example, the look and feel will now be very much like how lots and serials are allocated in Kit issues. This is there is a grid (editable listview) in which you capture both Reserved Lots and Reserved Serials, i.e. Lots and Serials are now captured in the one grid (editable listview).

--- Where would I see this change? ---

In the WIP Job Entry program

Legend:

5 - Critical. This could mean that the software will cause an unrecoverable data loss, it may have a serious financial implication to the customer, there may be a security issue, or there may be legal implications.

4 - Serious. This means that there is a remote chance of data loss, a remote chance of a financial implication to the customer, or that there is a possibility that it will affect many customers.

3 - Error. There is an error in the functionality of the program, but this will not stop the customer doing any major part of their business.

2 - Minor Error. There is a minor error in the functionality of the program, and this will not stop a customer doing any part of their business. This is likely to just be a cosmetic problem.

1 - Enhancement. This is an enhancement to the system.

0 - Ease of use. This may be something that could make life easier for the customer, or a change in the user interface for consistency or to improve usability.
