SYSPRO 7 Update 1 Port:012

Perception: 5

74402   **Perception: 5**

2016-02-22
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 74402
New Program and Version: SORPS3 (7.0.035)
Release Notes read as follows:

--- Synopsis ---

Using Dispatch Note Maintenance sometimes the journal year and month were being posted with zeroes.

--- Details of Problems Experienced ---

Using Dispatch Note Maintenance sometimes the journal year and month were being posted with zeroes. This happened if you had one line on your dispatch and you cancelled that line and from within Dispatch Maintenance you add from sales order, the new entry would write a journal with zero posting year and month.

--- Changes Implemented ---

Using Dispatch Note Maintenance sometimes the journal year and month was being posted with zeroes. This happened if you had one line on your dispatch and you cancelled that line and from within Dispatch Maintenance you add from sales order, the new entry would write a journal with zero posting year and month it will now post to the current year and month.

74238   **Perception: 4**

2016-02-05
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 74238
New Program and Version: IMPFRM (7.0.046)
Release Notes read as follows:

--- Synopsis ---

Custom forms - Values not provided for List type custom form fields cause COMTFM to fail with validation errors

--- Details of Problems Experienced ---

When you call COMTFM to add/update a custom form field and do not provide values for one or more List type fields the post fails with a invalid value for the List type fields. would typically be the case when the default value for the field is a space (or Space) as you can not capture a space in the list.

--- Changes Implemented ---

The program IMPFRM was changed to check the value provided for a List type form field against the default value before validating the value against the list items. will now allow either the default value or a value from the list content to be supplied. It will only allow an empty element for a list type field if the default value for that field is spaces. If the field is either numeric or a date and an empty element is supplied then the validation will fail as the value will not match either the default value for the field or any value in the list for that field.If you do not want to update a value for a field then do not include the element in the input XML to COMTFM and the default value will be applied.The insertion of default values will only be done on an Add, not on an Update.

73893   **Perception: 4**

2016-02-24
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 73893
New Program and Version: RMAP40 (7.0.041)
New Program and Version: RMAP50 (7.0.061)
Release Notes read as follows:

--- Synopsis ---

When you have Tax by Advanced Geo Codes and you generate a Credit Note via the RMA system for a tax exempt customer, the tax field would incorrectly remain blank.

--- Details of Problems Experienced ---

When you have Tax by Advanced Geo Codes and you generate a Credit Note via the RMA system for a tax exempt customer, the tax field would incorrectly remain blank.

--- Changes Implemented ---

The RMA Detail and End RMA programs have both been changed to ensure that when you have Tax by Advanced Geo Codes and you generate a Credit Note via the RMA system for a tax exempt customer, the tax field will be populated with "N".

73401   **Perception: 4**

08/02/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 73401
New Program and Version: SORTDA (7.0.023)
Release Notes read as follows:

--- Synopsis ---

When using Dispatch Note Add Lines from SO, and posting multiple MerchandiseLine nodes, it caused a memory leak.

--- Details of Problems Experienced ---

When using Dispatch Note Add Lines from SO, and posting multiple MerchandiseLine nodes, it caused a memory leak. addition to this, we found that if an item was dispatched from multiple bins, instead of a single bin, the quantity on hand on the LotDetail table was not updated correctly.

--- Changes Implemented ---

The Dispatch Note Add Lines from SO business object has been updated to clear any objects created in memory, in between the processing of multiple merchandise lines. program has also been corrected to update the quantity on hand on the LotDetail table correctly when dispatching items from multiple bins.

72400   **Perception: 4**

05/02/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 72400
New Program and Version: SORPOE (7.0.035)
Release Notes read as follows:

--- Synopsis ---

In SO Entry Express, if you added a line for a kit item and any of the components needed lot/bin/serial allocations, you got an error for invalid warehouse.

--- Details of Problems Experienced ---

In SO Entry Express, if you added a line for a kit item and any of the components needed lot/bin/serial allocations, you got an error for invalid warehouse.

--- Changes Implemented ---

The SO Entry Express program has been changed to pick up the correct warehouse for a kit component, when doing allocations.

69004   **Perception: 4**

2016/02/26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 69004
New Program and Version: _EV_74354 (7.0.)
Release Notes read as follows:

--- Synopsis ---
There was a requirement to be able to setup printer permissions per device instead of per user only.
--- Details of Problems Experienced ---
Default printer permissions could only be setup against a user.
--- Changes Implemented ---
The program has been changed to allow printer permissions to be setup per branch, role, user and device. The priority the permissions will be applied in is that device has the highest priority then user then role and then branch. So if there is a permissions setup for a branch and the user the user permission will take precedence and be applied. One thing to note is that the user might belong to more than one role. In this scenario if there is a permission against each role and one role denies access and another role allows access the allow permission will take precedence.

Perception: 3

74784   **Perception: 3**

2016-02-26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 74784
New Program and Version: SYSPROREPORTVIEWER.EXE (7.0.004)
New Program and Version: SYSPROREPORTVIEWER2013.EXE (7.0.000)
New Program and Version: _EV_74407 (7.0.)
Release Notes read as follows:

--- Synopsis ---
When printing the BOM Trial Kitting report it, prints with the incorrect page orientation
--- Details of Problems Experienced ---
When printing the BOM Trial Kitting report it, prints with the incorrect page orientation
--- Changes Implemented ---
There was a bug in the SYSPRO Report Viewer prorgram that was setting the incorrect page orientation of the report when printing. Please note that the report prints landscape by design

SYSPRO 7 Update 1 Port:012

74755   **Perception: 3**

2016-02-19
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 74755
New Program and Version: SRSCTL (7.0.014)
Release Notes read as follows:

--- Synopsis ---
SRS Reports - print request dialog is not shown when the print request dialog flag is selected
--- Details of Problems Experienced ---
When you print a SRS report from inside a standard SYSPRO program the print request dialog behaviour is switched around. In other words you get prompted to select a printer when print request is off and you do not get prompted for one when it is switched on.
--- Changes Implemented ---
The program SRSCTL has been changed to correctly pass the print request flag to the preview report program.

Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 74552
New Program and Version: ARSQCR (7.0.028)
New Program and Version: AR_CREDIT_MANAGEMENT (7.0.004)
New Program and Version: AR_CREDIT_MANAGEMENT.XML (7.0.)
New Program and Version: AR_TRIAL_BALANCE (7.0.005)
Release Notes read as follows:
--- Synopsis ---
When you ran the AR Trial Balance report and the AR Credit Management report void PD checks were included on the report.
--- Details of Problems Experienced ---
When you ran the AR Trial Balance report and the AR Credit Management report void PD checks were included on the report.
--- Changes Implemented ---
When you run the AR Trial Balance report and the AR Credit Management report you will have an option to include void PD checks on the report. If the 'Include void PD checks' option is selected the void PD checks will still print on the report and be included in the PD checks totals. If the option has not been ticked the void PD checks will not print on the reports and will not be included on the PD checks totals. You will only be able to select the 'Include void PD checks' option if you have selected to include post dated checks on the reports. AR Credit Management business object now returns the status of each PD check. The status does not print on the AR Trial Balance Report or the AR Credit Management Report by default. Both these reports can be customised to show the status on the PD checks.

2016-02-26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 74359
New Program and Version: _EV_74354 (7.0.)
Release Notes read as follows:

--- Synopsis ---
POS will only reflect changes made to the new settings file if Internet Information Services (IIS) or the AppPool is restarted

--- Details of Problems Experienced ---
When the new settings file is updated by a user the changes would only be reflected if the system is restarted which means IIS has to be resterted. This would cause the operators to not be able to transact during this restart.

--- Changes Implemented ---
The program has been changed to automatically reflect the changes in the system once the new settings file is saved.

Event: 74122
New Program and Version: COMKGN (7.0.018)
New Program and Version: IMPBIK (7.0.018)
New Program and Version: IMPTIK (7.0.007)
Release Notes read as follows:

--- Synopsis ---

You were unable to set your job numbering to be alphanumeric and automatic by company

--- Details of Problems Experienced ---

You were unable to set your job numbering to be alphanumeric and automatic by company. This is an issue if you have lot traceability installed and you wish the lots for manufactured items to be equal to job but you are accepting lots from suppliers and these lots are alphanumeric.

--- Changes Implemented ---

The following changes have been made to allow you to define the job as alphanumeric and automatic: check that allows you to only set job numbering to automatic if the key type is numeric has been removed. IE you can set it to automatic even if it is set to alphanumeric. a job is generated and the type is alphanumeric it will be created according to the presentation length. is important to note that because the job is alphanumeric the key is generated to fit the presentation length defined as opposed to the full numeric length of 15 characters. For example generating a job with the next job set to 1234 with a presentation length of 8 characters the job number generated will be '00001234' and not '000000000001234'. as the job is now alphanumeric when you enter the job in SYSPRO you will need to enter the leading zeros.

Release Notes read as follows:

--- Synopsis ---

When you ran the Alternate Currency Maintenance Program and you added an alternate currency the BegYearBal on the GenAltCurHst was calculated using the incorrect rate.

--- Details of Problems Experienced ---

When you ran the Alternate Currency Maintenance Program and you added an alternate currency the BegYearBal on the GenAltCurHst was calculated using the incorrect rate.The program used the rate for the closing period of the current year instead of the rate for the closing period of the previous year. you only selected to add alternate currencies for a range of years the GenAltCurHst table was created for all years.

--- Changes Implemented ---

When you run the Alternate Currency Maintenance Program and you add an alternate currency the BegYearBal on the GenAltCurHst is now calculated using the correct rate. The program will use the rate for the closing period of the previous year. For the first year selected on the grid the program will calculate the previous years closing date by using the closing date for that line and subtracting 1 from the year. you only select to add alternate currencies for a range of years the GenAltCurHst table will only be created for the selected years.

Event: 73361
New Program and Version: IMP040 (7.0.299)
New Program and Version: IMPTRN.WRK (7.0.)
New Program and Version: IMPTRN_270200.XML (7.0.)
New Program and Version: IMPTRN_270203.XML (7.0.)
New Program and Version: IMPTRN_270209.XML (7.0.)
New Program and Version: IMPTRN_270215.XML (7.0.)
New Program and Version: IMPTRN_270216.XML (7.0.)
New Program and Version: SORPOE (7.0.036)
Release Notes read as follows:

--- Synopsis ---
Variables for discount percentages 2 and 3 were not available in eSignatures when adding/changing an order and adding/changing a merchandise line

--- Details of Problems Experienced ---
Variables for discount percentages 2 and 3 were not available in eSignatures when adding/changing an order and adding/changing a merchandise line.

--- Changes Implemented ---
The SO Entry program has been changed to output discount % 2 and 3 when adding an order and merchandise line. The SO Entry Express program has been changed to output discount % 2 and 3 when adding an order. addition, a new eSignature transaction has been added which allows you to validate the order header information at end order, in case it changed since it was saved at the time of adding the lines.

2016-02-26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 73357
New Program and Version: ARSPM2 (7.0.011)
New Program and Version: IMPCFM.IMP (7.0.007)
Release Notes read as follows:

--- Synopsis ---
There is a requirement for AR Permanent Entry Maintenance program to have custom forms.

--- Details of Problems Experienced ---
There is a requirement for the AR Permanent Entry Maintenance program to have custom forms.

--- Changes Implemented ---
The AR Permanent Entry Maintenance program has been modified to cater for custom forms.

73316   **Perception: 3**

2016/02/10
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 73316
New Program and Version: IMPFRO (7.0.194)
Release Notes read as follows:

--- Synopsis ---

If you have added custom columns to a list view, and if the custom columns are from different tables, and if you have more
than 1,000 rows in the list view, then performance is severely degraded.

--- Details of Problems Experienced ---

If you have added custom columns to a list view, and if the custom columns are from different tables, and if you have more
than 1,000 rows in the list view, then it's possible that the performance of populating the custom columns is degraded
considerably.

--- Changes Implemented ---

The fault was in the logic of how the system processed across different tables in the same run of populating a large
number of rows in a list view.This has now been corrected.

73245   **Perception: 3**

15/02/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 73245
New Program and Version: IMPPMP (7.0.020)
Release Notes read as follows:

--- Synopsis ---

In "IMPPMP - Operator Maintenance" the network username for the source operator was copied to the new operator.

--- Details of Problems Experienced ---

In "IMPPMP - Operator Maintenance" when you copy an existing operator to a new operator, the network username for the
source operator was copied to the new operator. As a result, when attempting a subsequent login with the source operator
the new operator is logged in instead of the source operator.

--- Changes Implemented ---

"IMPPMP - Operator Maintenance" was amended to appropriately handle the Network user name so that the new operator
can be correctly used to log into SYSPRO.

SYSPRO 7 Update 1 Port:012

73238   **Perception: 3**

2016/02/15
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 73238
New Program and Version: COMBRW (7.0.030)
Release Notes read as follows:

--- Synopsis ---
When browsing for filter values from a SRS Report the key values are not formatted for presentation length.

--- Details of Problems Experienced ---
When browsing for key values from a SRS report the browse screen always shows the full key value for numeric keys.The values are not formatted according to the Key Settings for presentation length.

--- Changes Implemented ---
COMBRW has been changed to format values for key fields according to presentation length settings when called from SRS.When called from e.Net COMBRW will still return the full key value as before.

73210   **Perception: 3**

2016-02-17
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 73210
New Program and Version: IMPMCY (7.0.019)
Release Notes read as follows:

--- Synopsis ---
When you printed a company's setup options, the SMTP default - 'Method when emailing' was being omitted from the report.

--- Details of Problems Experienced ---
When you printed a company's setup options, the SMTP default - 'Method when emailing' was being omitted from the report.

--- Changes Implemented ---
The Company Maintenance program has been changed to ensure that the SMTP default option - 'Method when emailing' is now being ouput to the report. This option is on the General Tab under the heading "Email/SMTP Settings". change to this option is now also being output to the Amendment Journals.

72965   **Perception: 3**

2/5/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 72965
New Program and Version: IMP040 (7.0.298)
New Program and Version: SORPOE (7.0.035)
Release Notes read as follows:

--- Synopsis ---

If you changed the ship date on a credit note after attaching invoice lines, a second credit note was created and the original credit note was left in progress.

--- Details of Problems Experienced ---

If you changed the ship date on a credit note after attaching invoice lines, a second credit note was created and the original credit note was left in progress.

--- Changes Implemented ---

The SO Entry programs have been changed to ensure that you can change the ship date on a credit note which has invoice lines attached and add extra lines to the same credit note.

72959   **Perception: 3**

26/02/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 72959
New Program and Version: _EV_74354 (7.0.)
Release Notes read as follows:

--- Synopsis ---

Operator discount percentage not taken into account for supervisor authorization on discounts

--- Details of Problems Experienced ---

When a discount margin % is setup against a "Operator - Max discount allowed Percentage" it used the value setup against the "Branch - Sales - Operator Discount Margin %" instead of the value setup against the operator to determine if supervisor authorization is required.

--- Changes Implemented ---

The program has been fixed to check if the value setup against the operator is greater than or equal to zero. If it is then it will be used instead of the value setup against the branch. If the value against the operator is -1 then the value against the branch will be used.

SYSPRO 7 Update 1 Port:012

72804   **Perception: 3**

22/02/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 72804
New Program and Version: SALP90 (7.0.012)
Release Notes read as follows:

--- Synopsis ---
When you ran the Sales Analysis Target Maintenance program then the program could not load the selected sales history summary targets.

--- Details of Problems Experienced ---
When you ran the Sales Analysis Target Maintenance program then the program could not load the selected sales history summary targets. This happened when you had a large data set and the program would incorrectly load all the targets for the selected target type.

--- Changes Implemented ---
The Sales Analysis Target Maintenance program has been changed to ensure that the correct sales targets are loaded using the key areas for the summary type.

72303   **Perception: 3**

2/26/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 72303
New Program and Version: IMPFRO (7.0.196)
Release Notes read as follows:

--- Synopsis ---
The entry of a structured GL field is cumbersome because once you are editing a ledger code you cannot click outside of the mini-window that contains the ledger code.

--- Changes Implemented ---
The ledger code is now contained within a modeless window, which means you can click outside the ledger field.

72183   **Perception: 3**

2016-02-08
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 72183
New Program and Version: RMATRR (7.0.006)
Release Notes read as follows:

--- Synopsis ---
When creating a credit note in RMA from an exisiting invoice and pulling in lines that had trade promotions attached, you expected any off-invoice trade promotion miscellaneous lines to be added

--- Details of Problems Experienced ---
When creating a credit note in RMA from an exisiting invoice, and pulling in lines that had trade promotions attached, you expected any off-invoice trade promotion miscellaneous lines to be added.

--- Changes Implemented ---
Credit Off-Invoice Line Promotions from existing invoices. new Trade Promotions setup option â€˜Credit off invoice lines from invoicesâ€™ has been added to control the creation and updating of off invoice promotions on a credit note. When a credit note is built from an existing invoice and this option is selected, any off invoice promotions with an off invoice allowance type of 'Line promotion' that were applied on the invoice for the credited lines are now recorded against the credit note. These lines do not have to be selected by the user and will be ignored if they are selected. Any maintenance on the credit note lines that copied from the invoice will affect the off invoice promotions, whereas additional lines will not. When a qualifying credit note line quantity is changed, the value of the off invoice promotion miscellaneous line is reduced based on the quantity credited.

71981   **Perception: 3**

05/02/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 71981
New Program and Version: IMP040 (7.0.298)
New Program and Version: SORPOE (7.0.035)
Release Notes read as follows:

--- Synopsis ---
When adding a credit note and default UOM is not stocking, if you selected to allow zero quantity, it still tried to convert the zero quantity in alternate UOM to stocking causing a decimal error.

--- Details of Problems Experienced ---
In the SO Entry programs, when adding a credit note and default UOM is not stocking, if you selected to allow zero quantity, it still tried to convert the zero quantity in alternate UOM to stocking causing a decimal error.

--- Changes Implemented ---
The So Entry programs have been changed to allow you to save a credit note line with zero-qty if the default UOM is not stocking.

71719   **Perception: 3**

2016/02/16
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 71719
New Program and Version: ARSSMA (7.0.006)
Release Notes read as follows:

--- Synopsis ---
When you ran the AR Multiple Ship to Address Setup business object program, and submitted an element with the incorrect length, the program returned an error.

--- Details of Problems Experienced ---
When you ran the AR Multiple Ship to Address Setup business object program, and submitted an element with the incorrect length, the program returned an error.

--- Changes Implemented ---
When you run the AR Multiple Ship to Address Setup business object program, and submit an element with the incorrect length, the program no longer returns an error.

70556   **Perception: 3**

24/02/2016
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 70556
New Program and Version: RMAP20 (7.0.052)
Release Notes read as follows:

--- Synopsis ---
In RMA Issues and Receipts, when you were adding a new RMA, you were unable to add header notes until you added a line and subsequently had a RMA number.

--- Details of Problems Experienced ---
In RMA Issues and Receipts, when you were adding a new RMA, you were unable to add header notes until you added a line and subsequently had a RMA number.

--- Changes Implemented ---
The RMA Issues and Receipts program has been changed to allow you to add header notes before you add a line, as long as you have entered a valid customer.

2016-02-22
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 70104
New Program and Version: IMP040 (7.0.299)
New Program and Version: SORPOE (7.0.036)
Release Notes read as follows:

--- Synopsis ---
When you changed the multiple ship address on a line, the tax codes were not updated.

--- Details of Problems Experienced ---
When you changed the multiple ship address on a line, the tax codes were not updated.

--- Changes Implemented ---
The SO Entry programs have been changed to ensure that the correct tax codes are used when you change multiple ship code against the line.

69957   **Perception: 3**

2016-02-26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 69957
New Program and Version: _EV_74354 (7.0.)
Release Notes read as follows:
--- Synopsis ---
The ability to change override the customer's tax and gst status mid sale on all screens.
--- Details of Problems Experienced ---
The ability to change override the customer's tax and gst status mid sale on all screens.
--- Changes Implemented ---
The program was changed to allow the tax and gst status change mid sale. This action re-evaluates the entire order.

69913   **Perception: 3**

2016-02-15
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 69913
New Program and Version: COMBRW (7.0.030)
Release Notes read as follows:
--- Synopsis ---
The user was forced to enter the full length of the key in order for the browse to work correctly in SRS report form.
--- Details of Problems Experienced ---
The user was forced to enter the full length of the key in order for the browse to work correctly in SRS report form.
--- Changes Implemented ---
Change has been applied so that the user no longer has to enter the full length of the key for the browse to start at the correct entry.

69712   **Perception: 3**

2016-02-26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 69712
New Program and Version: _EV_74354 (7.0.)
Release Notes read as follows:
--- Synopsis ---
Point Of Sale take payment totals can be confusing if cash rounding has been setup in SYSPRO
--- Details of Problems Experienced ---
When viewing the Take Payment child window it shows a "TOTAL AMOUNT DUE" which is not rounded depending on the setup in SYSPRO. If you then take a cash payment for the full amount rounding will be applied as POS picks up that it is a cash payment being taken. This then causes the amount the operator has seen to differ from the amount that POS actually applies as payment and has the potential for creating confusion.
--- Changes Implemented ---
A new field has now been added on the take payment child window underneath "TOTAL AMOUNT DUE" and is called "Cash Amount Due" and will display the rounded total due depending on the SYSPRO setup options.

69353   **Perception: 3**

2016-02-26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 69353
New Program and Version: _EV_74354 (7.0.)
Release Notes read as follows:

--- Synopsis ---

When you create customers from point of sale as tax exempt it still uses the Cash customer's tax status for pricing.This is incorrect as you want the pricing to be tax exempt at this point.

--- Details of Problems Experienced ---

When you create customers from point of sale as tax exempt it still uses the Cash customer's tax status for pricing.This is incorrect as you want the pricing to be tax exempt at this point.

--- Changes Implemented ---

I now pass the cash customer code to the following business objects SORRSL, SORQOV. However, I additionally pass the TaxExempt flag based on the new customer's tax status to override the cash customer's tax status.

68219   **Perception: 3**

2016-02-26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 68219
New Program and Version: _EV_74354 (7.0.)
Release Notes read as follows:

--- Synopsis ---

There was a requirement to be able to setup document default mappings per branch instead of per user only.

--- Details of Problems Experienced ---

Default document and printer mappings could only be setup against a user.

--- Changes Implemented ---

The program has been changed to allow printer document mappings to be setup per branch, role, user and device. The priority the mappings will be applied in is that device has the highest priority then user then role and then branch. So if there is a mapping setup for a branch and the user, then the user mapping will take precedence and be applied. One thing to note is that the user might belong to more than one role. In this scenario if there is a mapping against each role and none against the user or device no default will be selected and the user will be able to select their layout as well as printer.

2016-02-26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 64181
New Program and Version: _EV_74354 (7.0.)
Release Notes read as follows:

--- Synopsis ---
There was a requirement to be able to setup printer permissions per branch instead of per user only.
--- Details of Problems Experienced ---
Default printer permissions could only be setup against a user.
--- Changes Implemented ---
The program has been changed to allow printer permissions to be setup per branch, role, user and device. The priority the permissions will be applied in is that device has the highest priority then user then role and then branch. So if there is a permissions setup for a branch and the user the user permission will take precedence and be applied. One thing to note is that the user might belong to more than one role. In this scenario if there is a permission against each role and one role denies access and another role allows access the allow permission will take precedence.

Release Notes for SYSPRO 7 Update 1 Port 012
Event: 74471
New Program and Version: COMQOG (7.0.002)
Release Notes read as follows:

--- Synopsis ---
When "COMQOG - COM Retrieve Group Security Details" was run by an operator who was denied access to the business object a memory leak error was returned.
--- Details of Problems Experienced ---
If the logged in operator was denied access to the program, standard security routines would have resulted in the number of objects at the beginning of the program and the number of objects at the end of the program not balancing. A memory leak exception was returned in this instance.
--- Changes Implemented ---
"COMQOG - COM Retrieve Group Security Details" has been amended to correctly process the number of objects in use at the beginning and at the end of the program.

Release Notes for SYSPRO 7 Update 1 Port 012
Event: 73351
New Program and Version: ARSP93 (7.0.001)
Release Notes read as follows:

--- Synopsis ---

When you ran the AR Terms Ageing Headings Maintenance program it did not conform to the Syspro standards.

--- Details of Problems Experienced ---

When you ran the AR Terms Ageing Headings Maintenance program it did not conform to the Syspro standards.1. The toolbar caption "Heading code:" should be "Ageing heading:"2. The caption in the form "Ageing heading code" should be "Ageing heading"3. The tooltip " Enter a Ageing Heading Code" should be "Enter a Ageing Heading"4. The word "Code" needs to removed from the tooltip of the four navigation buttons (First, Last, Previous and Next).

--- Changes Implemented ---

The AR Terms Ageing Headings Maintenance program has been changed so that it now conforms to the Syspro standards.1. The toolbar caption is now "Ageing heading:" instead of "Heading code:" 2. The caption in the formis "Ageing heading" instead of "Ageing heading code"3. The tooltip is "Enter an Ageing Heading" instead of " Enter an Ageing Heading Code"4. The word "Code" has been removed from the tooltip of the four navigation buttons (First, Last, Previous and Next).

SYSPRO 7 Update 1 Port:012

73314   **Perception: 2**

2016/02/23
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 73314
New Program and Version: APSQCI (7.0.002)
Release Notes read as follows:

--- Synopsis ---

When you ran the AP contra Invoice srs report the YearSelection filter type and filter value fields in the QueryOptions node were displaying the incorrect values. Filter type logic was inconsistent.

--- Details of Problems Experienced ---

When you ran the AP contra Invoice srs report the YearSelection filter type and filter value fields in the QueryOptions node were displaying the incorrect values. The year selection filter worked correctly but the display value in the query options node was incorrect.-The logic used to parse FilterType and FilterValue XML input to Query Business objects was inconsistent. could lead to inconsistent behavior between business objects and made the system difficult to enhance in future.

--- Changes Implemented ---

When you run the AP contra Invoice srs report the YearSelection filter type and filter value fields in the QueryOptions node are now displaying the correct values. XML parsing logic used to handle FilterType and FilterValue attributes has been changed to be more consistent. change will have no effect on existing query business objects but allows for future improvements.

73309   **Perception: 2**

2016-02-15
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 73309
New Program and Version: ARSQCR (7.0.027)
New Program and Version: AR_CREDIT_MANAGEMENT.XML (7.0.)
New Program and Version: AR_TRIAL_BALANCE (7.0.004)
Release Notes read as follows:

--- Synopsis ---

When you ran the AR Trial Balance Report the ageing always occurred in 6 buckets: Current, 30, 60, 90, 120, 150+.

--- Details of Problems Experienced ---

When you ran the AR Trial Balance Report the ageing always occurred in 6 buckets: Current, 30, 60, 90, 120, 150+. If you were running with 'Fixed Number of Days' ageing the report also aged to 6 buckets according to your terms setup.
'Number of Fixed Days' ageing option always used the system date to age the invoices and not the 'Ageing date' supplied on the 'Ageing options' pane. was a conflict in the program when the user selected an ageing method other than 'Statement date' and ran the trial balance or the credit management report with invoices that are 'Number of Fixed Days''.

--- Changes Implemented ---

When you run the AR Trial Balance Report you can now specify how many ageing buckets you would like. The program defaults to 6 but can be overwritten with any value from 1 to 6. All 6 ageing buckets will still print on the report, if they are not required the Crystal report will need to be customised to remove the extra ageing buckets. 'Number of Fixed Days' ageing option will now use the 'Ageing date' to age the invoices. there are invoices with the 'Number of fixed' days terms code, the 'Statement date' ageing method will be applied to the invoices regardless of the ageing method selected for the run of the program. This is applicable to the business object, credit management report and the trial balance.

2016/02/09
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 012
Event: 70356
New Program and Version: APSP01 (7.0.042)
Release Notes read as follows:

--- Synopsis ---
When you ran the balance function for AP Period End, the supplier phrase for translation was output multiple times for every supplier balance.

--- Details of Problems Experienced ---
When you ran the balance function for AP Period End, the supplier phrase for translation was output multiple times for every supplier balance. In addition, it was found that invoices which had a zero balance and Withholding Tax against them caused a reversal of the Withholding Tax in the next period when you ran the balance function or month end.

--- Changes Implemented ---
When you now run the balance function for AP Period End, the supplier phrase for translation is only output once as Supplier â€˜%1â€™ for every supplier. In addition the Withholding Tax is not reversed anymore for invoices with a zero balance when you run the balance function or month end in the next period.

Event: 74627
New Program and Version: COMTCY (7.0.000)
New Program and Version: IMPJNS.IMP (7.0.012)
Release Notes read as follows:

--- Synopsis ---
There is a requirement for the development of a business object that allows for the prevention or allowing of logins to one or more companies simultaneously.
--- Reason for enhancement ---
Currently the only way to prevent access to more than one company in SYSPRO is to change each company's setup options separately. is important to be able to prevent logins to companies so that certain functions, eg. period end functions can be executed uninterrupted. is a requirement to develop a business object that will accept input that allows a system administrator to allow or prevent logins to one or more companies simultaneously and to optionally provide a reason in the case of preventing logins. business object will enable SYSPRO administrators to be more efficient about allowing or preventing logins to multiple companies.
--- Details of enhancement ---
The following is a list of features that are availble in the new business object "COMTCY - Allow or Prevent Login to Company":
* Action : Allow or Prevent logins
* Reason : In the case of preventing logins, an optional reason is recorded in each company's control file.
--- Where would I see this change? ---
"COMTCY - Allow or Prevent Login to Company" will be available in the SYSPRO Business Object Reference Library.

New Program and Version: IMPNEW (7.0.015)
New Program and Version: LINK.WRK (7.0.)
New Program and Version: MSGCOMEN.IMP (7.0.020)
Release Notes read as follows:

--- Synopsis ---
There is a requirement for two new Espresso licensing mechanisms
--- Reason for enhancement ---
Espresso Linked Users of our customers have indicated that they would like some or all of their SYSPRO Operators to be able to use our Espresso mobile offering when they are away from their desks. This empowers them to be just as productive whether sitting at their desk, in a meeting, on-the-road, or at virtually any time or place. meet this requirement we have a new licensing mechanism allowing a site to opt-in to what we call 'Espresso Linked User' licensing. Espresso Users addition, with the extended supply chain becoming common place, many SYSPRO sites have started to provide Espresso to their customers allowing their customers access to queries and even transaction posting apps when appropriate. This allows their customers to manage the interaction with the SYSPRO site providing improved collaboration less management at the SYSPRO site and generally improved customer service and responsiveness with reduced cost.
--- Details of enhancement ---
Software License Agreement requesting a license you can specify two new options:
• Espresso Linked user license
• Number of Espresso External seats license information (LICENSE.XML) file provided will contain these values in a format that can be imported into a SYSPRO site. Setup System Setup (IMPSET) has been enhanced to allow entry of the 'Number of Espresso external seats'. This will typically match the number specified in your license and can be a 6 digit number. is stored in the IMPACT.INI file using the IMPESX=999999 tag System Setup (IMPSET) has been enhanced to allow entry of 'Espresso Linked users'. This is a checkbox allowing you to enable this licensing method. When checked, it means that each of your SYSPRO concurrent licensed users will have access to Espresso. is stored in the IMPACT.INI file using the IMPESL=1 tag - where '1' means checked. Maintenance Company Maintenance programs (new and legacy user interfaces) have been enhanced to allow viewing of these new Espresso system-wide settings and also when importing a LICENSE.XML file containing the new information these values will be verified as part of the SYSPRO licensing mechanism. Maintenance Operator Maintenance program (IMPPMP) has been changed so that instead of a simple checkbox against the 'Espresso user' prompt you can now indicate that the Operator is either a 'full-use' Espresso user, a Linked Espresso user or an External Espresso user. defined as an External Espresso user you must select the 'Functional Role' as '2 - Customer' on the 'e.net' tab. In addition, you must assign a single customer code to the operator code. Operator License Apportionment is a program that allows you to view all operators and to manage the Espresso license apportionment - this is simpler to use than editing operators one at a time. This program has also been updated to allow one of the Espresso licensing options to be applied to each operator as required.
--- Where would I see this change? ---
The System Setup, Company Setup, Operator Maintenance and Espresso License Apportionment programs have all been updated to handle the new options. addition, when logging into an Espresso application the appropriate license validation will be performed.

Legend:

5 - Critical. This could mean that the software will cause an unrecoverable data loss, it may have a serious financial implication to the customer, there may be a security issue, or there may be legal implications.
4 - Serious. This means that there is a remote chance of data loss, a remote chance of a financial implication to the customer, or that there is a possibility that it will affect many customers.
3 - Error. There is an error in the functionality of the program, but this will not stop the customer doing any major part of their business.
2 - Minor Error. There is a minor error in the functionality of the program, and this will not stop a customer doing any part of their business. This is likely to just be a cosmetic problem.
1 - Enhancement. This is an enhancement to the system.
0 - Ease of use. This may be something that could make life easier for the customer, or a change in the user interface for consistency or to improve usability.
