Port 009

The following is a summary of the enhancements that have been implemented for this port.

New Operator Program List report

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
COMQOP	Operator Program Access Query	000

Why was this done?

There was a requirement to produce a report detailing program access per operator.

What was done?

There is a new **Operator Program List** report that enables you to report on program access per operator. The report can be filtered by operator, role and group and you can optionally select to ignore role or group access in the event that you only want to report on a single configuration. You can optionally select/ignore the display of contact information and multiple access details and also whether to display conflicting programs.

Where can I see the change?

The **Operator Program List** report can be run from the **Administration** folder of the **Available Reports** pane in SYSPRO Reporting Services as well as the **Administration > Security > Reports** folder of the SYSPRO **Program List** pane.

Separate program to browse SO contract prices

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
SORPCQ	Browse on Sales Order Contract Prices	000

Why was this done?

There was a requirement to improve the performance and user experience of the **SO Contract Prices** program by implementing a browse on contract prices into its own program.

What was done?

There is a new **Browse on Sales Order Contract Prices** program. The program defaults to loading customer contract prices (20 contracts at a time) but includes the option to load buying group contracts. You can also maintain notes against each customer/buying group contract price listed.

Where can I see the change?

The **Browse on Sales Order Contract Prices** program can be loaded from the **Sales Orders > Contract Pricing > Browses** folder of the SYSPRO **Program List** pane.

Separate program to capture AR terms due dates

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
ARSP94	AR Terms Due Dates	000
ARSPMT	AR Invoice Terms Maintenance	013
IMPBTC	AR Invoice Terms	017

Why was this done?

There was a requirement for a separate program to capture invoice and discount due dates for AR terms.

What was done?

The due date functionality of the **AR Invoice Terms Maintenance** program has been moved to a new program which will be used to capture invoice and discount due dates.

Where can I see the change?

The **AR Terms Due Dates** program is loaded from the **Accounts Receivable > Setup** folder of the SYSPRO **Program List** pane.

Copy custom form data when copying purchase orders

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
PORP10	PO Entry	146

Why was this done?

There was a requirement to include custom form data when copying purchase orders.

What was done?

When copying purchase orders within the **PO Entry** program, there is a new **Copy custom forms** option that (if selected) will include the copying of custom form data.

Where can I see the change?

The new **Copy custom forms** option is displayed on the **Copy Purchase Order** window when you select **Copy** from the **Function** pulldown menu of the **PO Entry** program.

Fine-tuning MRP calculation (under construction)

Why was this done?

There is a requirement to be able to exclude specific sales orders, quotes, purchase orders, or requisitions from the **MRP Requirements Calculation**.

What was done?

Over the past few ports, a number of programs have been (and are in the process of being) updated to take account of this new functionality. This facility is, however, not yet available to implement.

Where can I see the change?

The changes are still in progress and will be available to implement at a later date.

New object for multiple bin locations for a stock code

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
INVSBI	Inventory Bin Maintenance	000

Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications for capturing multiple bin locations for a stock code or place a bin on hold functionality.

Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

New object for IO options

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
IOPS02	IO Stock Code Warehouse Options	000

Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications for capturing IO forecasting options at stock code/revision/release/warehouse level functionality.

Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

New object for asset capex type

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
ASSSCT	Asset Capex Type Maintenance	000

Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications for asset capex type functionality.

Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

New object for asset capex classification

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
ASSSCX	Asset Capex Classification Maintenance	000

Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications for asset capex classification functionality.

Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

New object for asset reasons for disposal

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
ASSSRD	Asset Reasons for Disposal Maintenance	000

Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications for asset reasons for disposal functionality.

Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

New object for requisition groups

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
PORSRG	Requisition Group Maintenance	000

Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications for requisition group maintenance functionality.

Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

New object for LCT elements

Version	Issue	Port
7.0	001_SP1	009

Program	Description	Version
PORSEL	LCT Element Maintenance	000

Why was this done?

A new business object was created to enable e.net Solutions developers to develop applications for LCT element maintenance functionality.

Where can I see the change?

Schemas and sample XML instances are available in the SYSPRO e.net Solutions Business Objects Reference Library.

Appendix

Additional resources

Training

SYSPRO provides extensive training materials to assist you in gaining a working knowledge of the modules and processes within SYSPRO. Please refer to the SYSPRO [InfoZone](#) for details on how to obtain these guides (<http://infozone.syspro.com/support>).

Support

SYSPRO's [InfoZone](#) provides up-to-date information about the product as well as more advanced tutorials for registered users.

Newsletter

As part of SYSPRO's ongoing commitment to keeping you informed about the latest product developments, a regular newsletter is distributed to the SYSPRO community. The newsletter covers many aspects of SYSPRO ranging from product enhancements to support-related information, known issues and useful tips. You can subscribe to this newsletter from the SYSPRO [InfoZone](#).

Forums

SYSPRO provides a number of active on-line [forums](#) for you to engage in various discussions about the product.
