Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80985
New Program and Version: QOTP13 (7.0.044)
Release Notes read as follows:

--- Synopsis ---

When you have esignatures set to log for adding operations in estimates and you copy an estimate from one parent to another, the ItemKey in the esignature log has the incorrect parent saved.

--- Details of Problems Experienced ---

When you have esignatures set to log for adding operations in estimates and you copy an estimate from one parent to another, the ItemKey in the esignature log has the incorrect parent saved. It should save the parent you copied to and not the parent you copied from.

--- Changes Implemented ---

When you have esignatures set to log for adding operations in estimates and you copy an estimate from one parent to another, the ItemKey in the esignature log now has the correct parent saved. It should save the parent you copied to and not the parent you copied from.

2017-04-19
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80840
New Program and Version: PORPRS (7.0.078)
Release Notes read as follows:

--- Synopsis ---
When receipting in all lines on a purchase order, under condition the quantity is lost and as a result, not only are the details from the receipt created with a zero qty but no GRN number is generated

--- Details of Problems Experienced ---
When receipting in all lines on a purchase order, with the purchase order option set to warn when acceptable variance exceeded during receipt all is set (whether a variance is detected or not), the quantity is lost when converting from the alternate unit of measure whilst testing the variance and as a result, not only are the details from the receipt created with a zero quantity but no GRN number is generated when numbering is not manual.

--- Changes Implemented ---
The Purchase Order Receipt program has been changed to retain the quantity, when receipting in all lines on a purchase order, with the purchase order option set to warn when acceptable variance exceeded during receipt all is set (whether a variance is detected or not), whilst converting from the alternate unit of measure during the the variance test. This was causing the details from the receipt to be created with a zero quantity and no GRN number to be generated when numbering is not manual.

Event: 80833
New Program and Version: ARSPCS (7.0.073)
New Program and Version: ARSSCS (7.0.056)
Release Notes read as follows:
--- Synopsis ---
When you printed a customer invoice and the tax system was configured as â€˜USA AVP Sales Taxâ€™, the city was not
printed on the customer invoice.
--- Details of Problems Experienced ---
When you printed a customer invoice from a sales order and the tax system was configured as â€˜USA AVP Sales Taxâ€
™, the city was not printed on the invoice. This occurred as a result of an error that existed in the Customer Maintenance.
Maintained or newly added Customers would lose the City Description against the City address lines (Ship or Sold).
--- Changes Implemented ---
When you print a customer invoice from a sales order and the tax system is configured as â€˜USA AVP Sales Taxâ€™,
the city is now printed on the invoice. This correction will only be applied to newly created invoices. Customers will need to
be maintained and saved with the correct extended tax codes in order to automatically update the City and State address
lines (Sold and Ship). The 'Description' against the extended tax code updates the 'City' address lines and the State code
against the extended tax code updates the 'State' address lines.

New Program and Version: SYSPRO7_UPDATE_701_0007_SYS.SQL (7.0.)

Release Notes read as follows:

--- Synopsis ---

There is a requirement for a minor database upgrade for SYSPRO 7 Update 1 0007. In addition, the data dictionary has been enhanced to include additional table definitions.

--- Details of Problems Experienced ---

When you login after installing this software upgrade your data dictionary and associated files will be upgraded to SYSPRO 7 Update 1 0007.

--- Changes Implemented ---

The data dictionary has been enhanced to include 54 table definitions not previously defined. These tables did exist in the system-wide, company and SRS databases but were not included in the data dictionary. For the first time these tables are now included in the data dictionary allowing most of the generic data access functions available to query these tables. example, the Data Dictoinary Viewer application (DDSBFI) used by many administrators, support personnel and developers, can now be used to view the table definitions (table name, description, keys and columns) and also to view the rows in the physical tables. any third party developers have accessed the SYSPRO data dictionary directly they should review their code to ensure that these tables are handled appropriately.

Event: 80887
New Program and Version: ESPRESSO_DATASTORE.XML (7.0.)
New Program and Version: SYSPRO.ARS.STANDARD.ESPRESSO.DLL (7.0.015)
New Program and Version: _EV_80720 (7.0.)
Release Notes read as follows:
--- Synopsis ---
When viewing existing orders in Customer Workbench, the grid only shows 20 orders even if there are more orders and
does not allow you to go the next page.
--- Details of Problems Experienced ---
When viewing existing orders in Customer Workbench, the grid only shows 20 orders even if there are more orders and
does not allow you to go the next page. Business Object SORQSO has an input element "ReturnOrders" the default
value is 20. This is the reason only 20 ordes will ever be returned.
--- Changes Implemented ---
Custom configuration is required for this change to take effect. is added to the datastore in SYSPRO. The customer needs
to change the default value(20) for ReturnOrders if they require more records to be returned. The workbench > existing
orders component will return number of orders specified in ReturnOrders field. The default value is 20 which means only
20 ordes will ever be returned. By increasing this value in the datastore, more orders will be returned and paging will occur
if more than 25 records are returned.

80845
        Perception: 3

2017-04-19
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80845
New Program and Version: SORP80 (7.0.030)
Release Notes read as follows:

--- Synopsis ---
SORP80 did not account for the "List price less chain discount" checkbox selection check.

--- Details of Problems Experienced ---
When you selected only the "List price less chain discount" checkbox for the Contract pricing method and started the review, the program would bring up a message box stating that at least one method should be selected, even though you have selected the "List price less chain discount" checkbox. When you selected any other method with the "List price less chain discount" checkbox, it worked and also filtered correctly.

--- Changes Implemented ---
A change was made to now also include the "List price less chain discount" checkbox as part of the checking process, to see if any of the methods were selected or not.

2017/04/19
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80809
New Program and Version: IMPFND (7.0.080)
Release Notes read as follows:

--- Synopsis ---

'Key Search' - Enter key on search text entry field is wrongly calling a Foreign Pricing program.

--- Details of Problems Experienced ---

'Key Search' - Enter key on search text entry field is wrongly calling a Foreign Pricing program. Enter key event code on search text entry field is the same as the event code for calling Foreign Pricing program.

--- Changes Implemented ---

'Key Search' - I changed the program to make sure it's not wrongly calling the Foreign pricing program when the Enter Key is pressed on search text entry field. I changed the event codes for Stockcodes-context(Right click on Stock code from the listview). Please note that anyone who has done any customization for this program may have to change to use these new events: Warehouse - 71000, Pricing - 71001, Foreign Purchase Prices - 71002, Alternate Stock Codes - 71003, Alternate Supplier - 71004, Notation list - 71005.

  Release Notes for SYSPRO 7 Update 1 Port 025
  Event: 80724
  New Program and Version: ARSPMP (7.0.009)
  New Program and Version: IMPFRO (7.0.206)
  Release Notes read as follows:

  --- Synopsis ---
  Predictive search does not work for a Product Class key in forms and/or toolbars.

  --- Changes Implemented ---
  This has been corrected.

80720   **Perception: 3**

2017/05/02
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80720
New Program and Version: ESPRESSO_SEARCHES.XML (7.0.)
New Program and Version: IMPESP.IMP (7.0.027)
New Program and Version: SYSPRO.SOR.QUICKENTRY.ESPRESSO.DLL (7.0.002)
New Program and Version: SYSPRO.SOR.STANDARD.ESPRESSO.DLL (7.0.018)
New Program and Version: SYSPROESPRESSOX64.EXE (7.0.019)
Release Notes read as follows:
--- Synopsis ---
Saving custom forms with an Error in Sales orders in Espresso still allows the order to save. The Price override in
Espressso in Sales Order line entry reverse when you click it the first time.
--- Details of Problems Experienced ---
When you save Custom Forms in Sales Orders in Espresso and the custom forms are saved automatically, the if any
validation errors occur, the sales order is still saved.When entering a new sales order line in Espresso and you change the
quantity and then click directly on the price override or price code override switch, it switches back to its previous value.
--- Changes Implemented ---
Updated program Espresso Install and Native Builds so when Custom Forms are saved automatically in Sales Orders,
validation is done first and if the sales order fails the validation, then an error is shown saying there was a problem with
custom forms and the order was not saved.Fixed the Price Override and Price Code Override Switch in Sales Order Line
Entry so it does not switch back when it is clicked for the first time.

Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80661
New Program and Version: IMP090 (7.0.111)
Release Notes read as follows:

--- Synopsis ---
When you ran the Factory Documentation Print program and printed consecutive docs without closing the print program in between, the second print was done with an additional blank page before the data
--- Details of Problems Experienced ---
When you print a single factory document consecutively using standard printing without closing the print program in between, then the second print is done with an additional blank page before the data itself is printed.
--- Changes Implemented ---
The factory document print program has been changed to ensure that an additional blank page is not printed before the data itself, when a second factory document is printed without closing the print program.

SYSPRO 7 Update 1 Port:025

80660   **Perception: 3**

2017/04/20
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80660
New Program and Version: IMPIMP (7.0.024)
Release Notes read as follows:

--- Synopsis ---

When you ran the Import Master Data Program, you could not update a Stock Code status â€˜On holdâ€™ to â€˜Release holdâ€™ with spaces as it would consider the cell to be empty.

--- Details of Problems Experienced ---

When you ran the Import Master Data Program, you could not update a Stock Code status â€˜On holdâ€™ to â€˜Release holdâ€™ with spaces as it would consider the cell to be empty.

--- Changes Implemented ---

The Import Master Data Program has been modified so that you can use an array of characters defined on the form to substitute a space and this enables an update of a Stock Code Status from â€˜On Holdâ€™ to â€˜Release holdâ€™.

80652   **Perception: 3**

2017/04/28
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80652
New Program and Version: _EV_80720 (7.0.)
Release Notes read as follows:

--- Synopsis ---

When changing the parameters used by Sales Order entry in Espresso AcceptOrdersIfNoCredit to Y, Espresso ignores the error and always gives the credit checking error from the Customer.

--- Details of Problems Experienced ---

When you change the parameters used by Sales Order entry in Espresso to AcceptOrdersIfNoCredit to Y, Espresso ignores the error and always gives the credit checking error from when the Customer was selected. It should create the order and place the lines in suspense if the above flag is set to Y.

--- Changes Implemented ---

Updated program Sales Order Entry in Espresso so it relies entirely on SORTOI to check the credit status of the customer and applies the SORTOI property AcceptOrdersIfNoCredit correctly which can be set in the Espresso Custom Configuration. Previously it would ignore this flag and only apply the error from when the customer is selected. The ErrorMessage returned by SORTOI is in a different position for credit checks, added code to take this into account as well.

80646 **Perception: 3**

2017/04/26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80646
New Program and Version: APSP99 (7.0.048)
Release Notes read as follows:

--- Synopsis ---

When you ran the AP Check and Remittance Print program and used the Standard Document Format, the presentation length of the numeric Supplier Code was incorrect.

--- Details of Problems Experienced ---

When you ran the AP Check and Remittance Print program and used the Standard Document Format, the presentation length of the numeric Supplier Code was incorrect. It did print the full 15 characters of the Supplier key instead of the presentation length with or without leading zeros.

--- Changes Implemented ---

When you run the AP Check and Remittance Print program and use Standard Document Format, the presentation length of the numeric Supplier Code will be printing with or without leading zeros depending on the setup.

Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80542
New Program and Version: _EV_80816 (7.0.)
Release Notes read as follows:

--- Synopsis ---

When doing an End of Day with large amounts of data, the system timesout after 5 minutes.

--- Details of Problems Experienced ---

When doing an End of Day with large amounts of data, the system timesout after 5 minutes. This is because the default service timeout is set to 5 minutes.

--- Changes Implemented ---

A new system configuration has been introduced to allow the service timeout for the End of Day Service to be configured by the user. In the SystemConfig.xml file in the POS install directory, a new option called has been added. The default is 5 but if you are posting large amounts of data (specifically EFTs), then you should set this accordingly.

Release Notes for SYSPRO 7 Update 1 Port 025
Event: 80253
New Program and Version: IMPC7D (7.0.009)
Release Notes read as follows:

--- Synopsis ---

When converting Custom Form Data from SYSPRO 6.1 to SYSPRO 7.0 and an error occurred during the conversion, the migration was only partially completed but showed as completed and could not be resumed.

--- Details of Problems Experienced ---

When converting Custom Form Data from SYSPRO 6.1 to SYSPRO 7.0 and an error occurred during the conversion, the migration was only partially completed but showed as completed and could not be resumed.

--- Changes Implemented ---

"IMPC7D - SYSPRO 7 Upgrade Custom Forms" has been amended to convert each legacy table as well as it's data inside a single transaction. Thus, if at any point during the conversion of a single table an error occurs, the transaction is rolled back. When resuming the conversion, the conversion resumes at the point of error, i.e. the table in which the conversion error originally occurred, is the starting point for the resumption of the conversion process.

New Program and Version: SQL.PRO (7.0.)
New Program and Version: SQL.WRK (7.0.)
Release Notes read as follows:
--- Synopsis ---
There is a requirement to support SYSPRO Harmony tables. This includes a transaction posting business object used to create tracking tables.
--- Reason for enhancement ---
This is part of a larger SYSPRO Harmony project to be released during 2017.
--- Details of enhancement ---
A new business object (COMTHM) has been created that allows the Harmony infrastructure to add tracking tables. Tracking tables have the same name as standard SYSPRO tables except have a '#' prefix. example the 'ArCustomer' tracking table will be named 'ArCustomer#'. creates a table with the same key as the standard SYSPRO table and also includes a column named 'PostDateTime'. that are to be tracked can be added using definitions from the standard SYSPRO table and in addition user-defined column information can also be added to the tracking tables. well as the business object described above this event is also used to cater for internal developers to be able to access Harmony databases and tables. Harmony is a SQL Server only feature.
--- Where would I see this change? ---
The business object reference library will contain details of this business object. In addition the SYSPRO Harmony feature uses this business object. this functionality will be made generally available in a later port.

New Program and Version: IMPDG6 (7.0.034)
Release Notes read as follows:
--- Synopsis ---
Several areas in the SQL health checks did not provide enough coverage in highlighting possible issues with the database
--- Details of Problems Experienced ---
Several areas in the SQL health checks did not provide enough coverage in highlighting problems. We have therefore
extended the SQL health check information as follows: Tables and Columns
. Ensure that columns do not allow NULLS
. Ensure that default values defined for columns
. If column is user defined then must allow NULL or have a default keys
. Validate columns and sequences inside foreign keys
. Ensure that standard foreign keys are disabled
. Only check user defined foreign keys if they are linked to a SYSPRO table (include custom form tables)
. If user defined foreign key linked to SYSPRO table then ensure that it is disabled
--- Changes Implemented ---
The SQL health checks have been extended to improve the coverage in highlighting possible issues with the database.

There is a slow performance in MRP Calculation when archived Bill of Materials are in use since upgrading to SYSPRO 7
--- Details of Problems Experienced ---
There is a slow performance in MRP Calculation when archived Bill of Materials are in use since upgrading to SYSPRO 7.
Every field read-in from the BOM archives, were being converted to the SYSPRO 7 field lengths during a MRP snapshot
making calculation to run for a very long time.
--- Changes Implemented ---
The COM XML BOM Rehydration program has been changed so that only the three fields that changed between SYSPRO
6.1 and SYSPRO 7 are converted. The three fields that are converted are Supplier, Revision and Release. This will
substantially reduce the time it takes for the MRP Calculation to run.

2017/04/26
Ported for SYSPRO 7
Release Notes for SYSPRO 7 Update 1 Port 025
Event: 79118
New Program and Version: IMPSTC (7.0.004)
New Program and Version: STDBEGIN.PRO (7.0.)
New Program and Version: SYSPROSA_SYSPRO.DLL (7.0.001)
New Program and Version: WWLINK.WRK (7.0.)
Release Notes read as follows:
--- Synopsis ---
There is a requirement for SYSPRO applications to import master data from a spreadsheet. You can copy and paste rows from a spreadsheet to a grid but there are size limitations.
--- Details of Problems Experienced ---
This change is to provide architecture to allow the Master Data Import program (IMPIMP) to be enhanced to import data directly from a spreadsheet rather than having to copy from a spreadsheet and paste into the grid in IMPIMP. into a grid has scalability issues and will run out of memory or other resources when a large number of rows is pasted.
--- Changes Implemented ---
New functions have been provided to allow SYSPRO developers to call setup business objects with the contents of a spreadsheet. when the Master Data Import (IMPIMP) has been enhanced to use these new functions will an end-user see any changes. review the SYSPRO InfoZone from time-to-time to see when IMPIMP has been made generally available with this new capability.

Event: 78721
New Program and Version: IMPSCP (7.0.015)
New Program and Version: SYSPRO7_CONVERT_DUMMYLOTS.SQL (7.0.002)
New Program and Version: SYSPRO7_CONVERT_SALHISTORYSUMMARY.SQL (7.0.001)
Release Notes read as follows:
--- Synopsis ---
SYSPRO 7 Conversion - Duplicate key errors during the Dummy Lot conversion were not reported
--- Details of Problems Experienced ---
At the end of the SYSPRO 7 conversion the script could attempt to convert dummy lots on various standard tables that
have already been converted. If any errors occurred during the conversion of these dummy lots then no error was reported
so there was no way of knowing that the coversion had hit a problem.
--- Changes Implemented ---
The static scripts to convert the Dummy lots and Sales History Summary keys have been changed to perform the update
inside a transaction so that any updates are rolled back if an error occurs. This error is then displayed to the administrator
when running the conversion so that they know to go and correct the data before restarting the conversion.

SYSPRO 7 Update 1 Port:025

Legend:

5 - Critical. This could mean that the software will cause an unrecoverable data loss, it may have a serious financial implication to the customer, there may be a security issue, or there may be legal implications.

4 - Serious. This means that there is a remote chance of data loss, a remote chance of a financial implication to the customer, or that there is a possibility that it will affect many customers.

3 - Error. There is an error in the functionality of the program, but this will not stop the customer doing any major part of their business.

2 - Minor Error. There is a minor error in the functionality of the program, and this will not stop a customer doing any part of their business. This is likely to just be a cosmetic problem.

1 - Enhancement. This is an enhancement to the system.

0 - Ease of use. This may be something that could make life easier for the customer, or a change in the user interface for consistency or to improve usability.
