Event: 75102**New Program and Version:** INVTMO (7.0.059)

Release Notes read as follows:

--- Synopsis ---

e.net: When posting an Immediate Transfer for a lot-traceable item, the program was looping causing the system to hang.

--- Details of Problems Experienced ---

When posting an Immediate Transfer for a lot-traceable item, the program was looping causing the system to hang. was caused when the LotTransaction rows were being updated with the journal number. It was picking up the same LotTransaction row every time and never moving past it. also found a memory leak. This happened if you processed multiple FIFO buckets for a actual-costing lot item or an actual-costing serialised item.

--- Changes Implemented ---

The inventory Transfers business object has been changed to update the LotTransaction rows wit the journal number correctly, instead of getting stuck on the same row. memory leak caused when using multiple FIFO buckets has been fixed.

Release Notes read as follows:

--- Synopsis ---

There is a requirement for the minor database upgrade for SYSPRO 7 Update 1 0003 (May 2016) to include a new system-wide table. Until now only company specific database changes have been applied.

--- Details of Problems Experienced ---

There is a requirement for the minor database upgrade for SYSPRO 7 Update 1 0003 (May 2016) to include a new system-wide table. Until now only company specific database changes have been applied. is striving to provide seamless incremental updates allowing us greater agility in providing new features without sites having to wait for a significant version upgrade.

--- Changes Implemented ---

SYSPRO 7 Update 1 port 014 (May 2016) has a minor database upgrade sub-version '0003'. the first time these minor database upgrades include a system-wide table (named 'AdmOperatorPwd') that is required for the Microsoft Office 365 integration. This feature will be released on a separate event. each SYSPRO port has been applied you should immediately login to SYSPRO as an administrator. This will detect if there are any minor database upgrades and apply them as necessary. now onwards these changes can include new tables, or new columns in existing tables, in the system-wide database ('SysproAdmin'). These updates are applied seamlessly, allowing us greater agility in providing new features without sites having to wait for a significant version upgrade.

Release Notes for SYSPRO 7 Update 1 Port 014

Event: 75747**New Program and Version:** ARSPMS (7.0.013)

Release Notes read as follows:

--- Synopsis ---

When you ran the Salesperson Maintenance program and collector run was not in use, deleting a salesperson belonging to more than one branch resulted in a SQL error.

--- Details of Problems Experienced ---

When you ran the Salesperson Maintenance program and collector run was not in use, deleting a salesperson belonging to more than one branch resulted in a SQL error. In addition, other errors found were: 1. copying data from an existing branch/salesperson to a new branch/salesperson combination, saving this new data and then tabbing off the salesperson did not populate the form with the correct data. This happened whether the collector run was in use or not. 2. if the collector run was in use only, and you entered a branch/salesperson combination that did not exist, the data loaded onto the form was incorrect i.e. the values for the first branch found for that salesperson were loaded, even though the record entered did not exist.

--- Changes Implemented ---

When you run the Salesperson Maintenance program and collector run is not in use, deleting a salesperson belonging to more than one branch no longer results in a SQL error. Other errors fixed up: 1. copying data from an existing branch/salesperson to a new branch/salesperson combination, saving this new data and then tabbing off the salesperson now correctly populates the form with the correct data. 2. if the collector run is in use, and you enter a branch/salesperson combination that does not exist, the data loaded onto the form is now correct.

Release Notes read as follows:

--- Synopsis ---

There is a requirement for a minor database upgrade for port 014 (May 2016). The new version will be 7.0.1.0003.

--- Details of Problems Experienced ---

There is a requirement for a minor database upgrade for port 014 (May 2016). The new version will be 7.0.1.0003.

--- Changes Implemented ---

Port 014 consists of a number of new columns in existing tables (19 tables affected).

software handles this automatically as follows:- A data dictionary control file (BASE_701.TXT) defines the new database version (7.0.1.0003)- a SQL script (BASE_Update_701_0003.sql) will be run if required.

you login the DDSCTL.TXT (DBV= Entry) is compared with the current AdmVersion.DatabaseVersion column and if required applies the SQL script - this is performed for each SQL company. A small dialog is shown during this update. addition, a new data dictionary (BASE_701) and set of SQL file handlers (BASE_701) is supplied.

11-Apr-16

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 014

Event: 75360**New Program and Version:** PORP10 (7.0.150)

Release Notes read as follows:

--- Synopsis ---

When you ran PO Entry and Maintenance, you could not reallocate hierarchical heads and sections to a pre-existing material line

--- Details of Problems Experienced ---

When you ran PO Entry and Maintenance, you could not reallocate hierarchical heads and sections to a pre-existing material line. As a result the P&C Contract Query displayed incorrect figures.

--- Changes Implemented ---

PO Entry and Maintenance has been changed so that you may reallocate hierarchical heads and sections to a pre-existing material line. Note that you may still change heads/sections in Material Allocation Maintenance, but you still need to save these changes in Purchase Order Entry and Maintenance. You merely need to select to change a line in PO Maintenance, and the line is presented in the normal manner, then you need to select it. Lastly, save the line in PO Maintenance and the hierarchy is synchronized for the line.

15 04 2016

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 014

Event: 75078**New Program and Version:** ARSPDS (7.0.005)

Release Notes read as follows:

--- Synopsis ---

When you ran AR Post Dated Check Status program, cleared checks without a valid bank code or blank bank would not be available when you generated the payment.

--- Details of Problems Experienced ---

When you ran AR Post Dated Check Status program, cleared checks without a valid bank code or blank bank would not be available when you generated the payment. addition the following inconsistencies have been found:1) If there were no invoices allocated to post-dated checks, the AR Payment Run was generated and posted, but the check was not cleared from the AR Post Dated Check table and available for other payments.2) If the post-dated checks were not part of an AR Collector Run, the collector run column was enabled and you were able to enter a collector run.

--- Changes Implemented ---

When you run the AR Post Dated Check Status Program the bank code is now a mandatory field and must be entered. In addition where no invoices have been allocated to a post-dated check, you will not be able to generate the payment. The AR Payment Run or AR Payment and Adjustments program will be used to post these checks. Where post-dated checks are not part of an AR Collector Run, the collector run column is now disabled.

SYSPRO 7 Update 1 Port:014**74996****Perception: 3**

2016/04/18

Ported for SYSPRO 7

Release Notes for SYSPRO 7 Update 1 Port 014

Event: 74996**New Program and Version:** SYSPROINTEROPHOSTCONTROL40.DLL (7.0.003)

Release Notes read as follows:

--- Synopsis ---

.NET UserControl, using a static class causes unpredictable behaviour GetSetSysproInfo.

--- Details of Problems Experienced ---

When using an application in a SYSPRO with a .NET UserControl that has a static class which invokes the "GetSetSYSPROInfo" method, after you close the SYSPRO application, the dispose on the .NET UserControl was not being called. Each subsequent opening of the application would result in another event handler being created but only the last one would work.

--- Changes Implemented ---

The program SYSPROInteropHostControl40.dll has been corrected, this program now calls the dispose method on the UserControl. Now that the Dispose method is called, it is up to the developer of the .NET UserControl to make sure that all event handlers are removed from on the 'Destructor'.

Release Notes read as follows:

--- Synopsis ---

The Espresso Framework needs to be updated to support new application, add functionality and fix framework related bugs. These include barcoding fixes and Custom Forms Entry components support.

--- Details of Problems Experienced ---

The Espresso Framework needs to be updated to support new application, add functionality and fix framework related bugs. The changes made are as follows (I will keep adding to this list as changes are required and made):- For barcoding, when trying to get a value for a barcode entered the call failed because e.net licensing was required.- Custom Forms Entry for KeyFields in Espresso are required. All related SYSPRO Custom Forms functionality is also required along with this. The Custom Forms Components should be done generically for all key fields.

--- Changes Implemented ---

- For barcoding, made sure all calls don't check for e.net licensing because it forms part of Espresso.Added Custom Forms Entry components for the majority of KeyFields in Espresso.- Custom Forms Entry should support all functionality of existing SYSPRO custom form fields. By default all fields are added to the Custom Forms Entry Form and can be customized.- Lists are shown as dropdowns in Espresso- Lookups are shown as browses in Espresso- Defaults of Spaces, Zeros and Today are supported - Mandatory fields are checked before trying to save the custom form.- The Save Button in the Custom Form Entry component at the bottom can be used to save just the custom form fields or the Save All

SYSPRO 7 Update 1 Port:014

Button in the app used with it will call the save of the custom form fields. new Espresso Licence Types. Full User, External User and Linked Users.

Release Notes read as follows:

--- Synopsis ---

POS: Offline sync copies files multiple times for each instance of POS

--- Details of Problems Experienced ---

When POS runs a sync from a offline branch and multiple company POS's are installed it would copy all the files required to update SYSPRO and POS offline for each instance of POS. Changes have been made in the past to make sure all required components are included in the zip file being copied instead of just a specific company's files. This makes the multiple copies redundant.

--- Changes Implemented ---

The program has been changed to only copy the files once. It will then update SYSPRO once and then update each of the POS instances. Then it will restart the WCF service once only.

Release Notes for SYSPRO 7 Update 1 Port 014

Event: 73768**New Program and Version:** TPMQSO (7.0.007)**New Program and Version:** TPMTSO (7.0.007)

Release Notes read as follows:

--- Synopsis ---

The project introduces new features that are required for processing tax on Trade Promotions Accruals.

--- Reason for enhancement ---

Currently tax on accrual promotions is added at the time of invoicing the sales orders. In order to accrue the correct expense amount at the correct time, it is necessary to be able to add tax to the accrual only when finally posting the Accounts Receivable or Accounts Payable transaction.

--- Details of enhancement ---

This will be possible by using a new option to calculate tax at time of review. An additional option will allow a tax code to be captured against the promotion, and that code used to calculate the tax during the review when a Detail Sales Credit is posted. Individual promotions can be defined as non-taxable

--- Where would I see this change? ---

In Trade Promotions Setup the tax option for accruals and deductions has been changed to allow you to define the point at which tax is applied. Add at time of accrual, Add at time of review or No Tax Promotion code maintenance it will be possible to define whether the promotion is taxable and if it is then, where relevant, capture the tax codes.

Release Notes read as follows:

--- Synopsis ---

Contact Management Organization List Post Business Object to Support Dynamic Lists.

--- Reason for enhancement ---

The Contact Management System supports the concept of 'Dynamic Lists'. This means that you can define conditional logic to include or exclude customers, suppliers or accounts (known as 'organizations') and then at run-time the appropriate conditional logic will be applied. The generated list can be used by the Contact Query, Contact sync to Outlook or the Organization list query business object allowing access by third party apps. requirement is for the Organization List post business object (CMSTOL) to handle these types of dynamic organization lists. now only static organization lists were supported.

--- Details of enhancement ---

The Organization List post business object (CMSTOL) has been enhanced so that the "Add" list function allows for dynamic lists to be specified.

--- Where would I see this change? ---

This change only affects 3rd party developers who use the Organization List post business object (CMSTOL). This business object is available in the Business Object Reference Library.

New Program and Version: ADMCTLTP.MAM (7.0.)

New Program and Version: TPMP60 (7.0.026)

New Program and Version: TPMUQP (7.0.031)

Release Notes read as follows:

--- Synopsis ---

With a new option in the TPM Setup program to determine at what time tax applies to accruals, the TPM Promotion Review program needed to be updated to post AR Credits and AP Invoices correctly

--- Reason for enhancement ---

The TPM Setup program has new options to set when to apply tax to accruals and also to setup tax codes per promotions. The TPM Promotion Review program needs to be updated to do the calculations correctly according to the new options.

--- Details of enhancement ---

The TPM Promotion Review program has been changed to post AR Credits and AP Invoices with the correct tax amounts, based on the new TPM setup options for Accrual tax. the Post Detail Credit option, the TPM Promotion Review program also used the tax code saved against each promotion to calculate the posting amount, if the TPM setup option for Tax at promotion level is selected. a DS-RUN has been fixed when tabbing off the GST code field on the AP Invoice screen in the TPM Promotion Review program.

--- Where would I see this change? ---

The changes can be seen in the TPM Promotion Review program on the posting screens.

New Program and Version: TPMPSP (7.0.024)

New Program and Version: TPMUQP (7.0.031)

New Program and Version: TPMUQP.LNK (7.0.)

Release Notes read as follows:

--- Synopsis ---

There is a requirement for the TPM Promotion selection Global and Line program to cater for the new Group selection, Automatic selection and Free goods stock list features introduced in project D3245.

--- Reason for enhancement ---

Group selection: To limit the amount of promotion codes that can be selected and applied to a sales order. Automatic

selection: To define the selection of promotions at promotion level instead of a company wide setup. Free goods stock list:

This feature will allow users to setup a list of free goods stock codes to select from, allowing the company to setup broader promotion codes.

--- Details of enhancement ---

The TPM Promotion selection Global and Line program has been changed to include new columns to display the options of each promotion clearer as well as to show the maximum. The TPM Promotion selection Global and Line program also has new pane to show the remaining selections within a promotion group. The TPM Promotion selection Global and Line program will also now ask for the free good stock code for free goods stock list promotions. The TPM Promotion Qualification utility has been changed to automatic select automatic promotions and to request the free good stock code for automatic free goods promotions. The TPM Promotion selection Global and Line program also has new select and deselect buttons and a multiple select listview to make promotion selection easier.

--- Where would I see this change? ---

Event: 71934**New Program and Version:** IMPTPM (7.0.016)**New Program and Version:** TPMUTX (7.0.000)**New Program and Version:** TPMUTX.LNK (7.0.)

Release Notes read as follows:

--- Synopsis ---

The TPM Setup program required new options to allow users to specify when to apply the tax portion to accruals as well as to have a tax code on the promotion level or not.

--- Reason for enhancement ---

If an accrual gets earned in one month and then only posted in another month, then the tax portion was forced into the first month. Now SYSPRO allows the option to dictate when the tax portion should be applied to the accrual amount.

--- Details of enhancement ---

A option to select the time the tax portion gets applied as "At time of accrual" or "At time of review" has been added to the TPM Setup program. An additional option has been added to the TPM Setup program to allow users to set a tax code per promotion. new COM TPM Tax Portion of Promotions utility program has also been added to recalculate the tax portion on current accruals when changing the new accrual tax options. This new utility program will also update existing promotions with the default accrual tax code if users request.

--- Where would I see this change? ---

The changes can be seen in the TPM setup program under the Defaults tab.
